Guaranteed for 15 Years— No More Roof Expense

When you use Dickelman Extra—your roof troubles are over. Our 15-year guaranty—stamped on every roll—and given to you in black and white protects you absolutely. It simply means that you will have no more roof expense—no more roof troubles—for at least 15 years after the date you purchase. Most likely you will never have to roof the same building again.

DICKELMAN EXTRA Galvanized Metal Roofing

We guarantee it for 15 years, but know it will last twice that long.

We know that our roofing which was put up 25 years ago is still in *excellent condition*—and should last 25 years longer. We do not simply tell you or *promise* you our roofing will last for 15 years—we *guarantee* it. Ask your dealer about DICKELMAN EXTRA. If he doesn't sell it, write us at once for sample and our valuable roofing book—sent prepaid. Know *why* we can *guarantee* our roofing for 15 years while others make vague promises that mean nothing.

The secret of the durability of Dickelman Extra lies in the wonderful system of galvanizing—and the high quality of the materials used. The metal sheet we use for a base is made by a special process which leaves it tough—yet pliable and open-grained. So the galvanizing material fills up the "pores"—and actually becomes a *part* of the finished sheet. This prevents it from cracking—scaling—wearing or rusting off.

Marlin

16 Gauge, Model 16
Repeating Shotgun
Grade D

This is a high grade, guaranteed repeating shotgun which weighs but $6\frac{1}{4}$ pounds, and yet is as effective as most 12 gauge guns which weigh $7\frac{1}{2}$ and 8 pounds.

The *Marlin* 16 gauge repeating shotgun is an exact copy of the *Marlin* Model 19 12-gauge and contains all the features which have made *Marlin* shotguns famous.

The solid top, side ejection, automatic recoil safety lock and closed-in action are present in Model 16; each part refined a little to meet the lighter charges of powder used in a 16 gauge shotgun.

Grade D has fine Damascus barrel and Grade C Model 16 *Marlin* shotgun barrels are made of "Special Smokeless Steel"; all *Marlin* barrels are bored to shoot both black and smokeless powders.

The working parts of Model 16 repeating shotgun are made of the finest quality of steel drop forgings, *cut down* from solid blocks to the nicely fitting parts of the finished shotgun.

With one shell in the chamber and five in the magazine, Model 16 shotgun can be fired six times in four seconds.

For grouse, quail, woodcock, prairie chickens, teal, woodchucks, squirrels, rabbits and all other smaller game this gun is unsurpassed. The upland shooter will readily see the advantage of a repeating shotgun weighing a pound to two pounds lighter than the average 12 gauge and yet having all the effectiveness of the heavier arm.

Send three stamps for catalog which fully describes all the *Marlin* guns.

DRINKS.

AFTER DINNER COFFEE.

Filippini.

Put 6 light tablespoons freshly ground coffee in an enameled sauce-pan, sprinkle $\frac{1}{2}$ cup cold fresh water over it, cover and let stand in a cold place 20 minutes. Pour over it $1\frac{1}{2}$ pints cold water, mix well, and set on the side of the fire letting come very slowly to the boiling point but without boiling. Stir a few times only while heating and immediately replace the cover. Remove from fire, let settle a moment, and strain through a cloth into a hot serving coffee pot. Will make 6 small cups.

CHOCOLATE.

Melt 4 ounces chocolate in a double boiler, add 2 tablespoons sugar, and 1 quart milk; stir till smooth; let boil 5 minutes or longer; when ready, beat until perfectly smooth with an egg beater; serve with whipped cream.

CLARET PUNCH.

Mrs. W. T. Sherman.

Take the yellow rind of 3 lemons, add it to 3 pounds granulated sugar, 1 tablespoon ground cinnamon, $\frac{1}{2}$ tablespoon ground cloves and 2 grated nutmegs. Pour over all 2 quarts boiling water, and let stand 1 hour. The spices should be put in a thin bag. Just before serving, add $\frac{1}{2}$ pint Jamaica rum and 3 bottles of claret. Add 3 or 4 sliced oranges.

COCOA.

Moisten 4 tablespoons cocoa with a little cold milk and add it to 1 quart boiling milk; stir and boil about 5 minutes.

COFFEE.

The best coffee is made by both browning and grinding just before it is needed; allow 1 heaping tablespoon to each person and 1 to the pot, mix with a little white of egg in cold water, and pour over it 1 cup for each person of freshly boiling water; let simmer 5 minutes and serve.

For Café au Lait pour into a cup at the same time equal quantities of scalding coffee and scalding milk.

Vienna coffee is served with whipped cream.

CURRANT SHRUB.

Take equal quantities of currant juice and water, sprinkle with grated nutmeg, and chill.

Raspberry Shrub is made in the same way but requires a little lemon instead of nutmeg.

EGG NOG, NO. 1.

Mrs. Hugh Ewing.

12 eggs, 1 quart milk, $\frac{1}{2}$ pint cream, $\frac{3}{4}$ pint French brandy, a little Jamaica spirits, 1 large teacupful sugar.

Beat the yolks with the sugar, pour the liquor on slowly and let stand some hours. Add the milk and cream, beat the whites of the eggs stiff, stir some in and put a little on top.

EGG NOG, NO. 2.

Mrs. Herbert Evans.

Beat the yolk of 1 egg with 2 tablespoons sugar; stir in 2 tablespoons brandy, put in a large glass and fill up with milk. Beat the white of the egg stiff and stir in last.

FRUIT PUNCH.

Mrs. Anise Holcomb.

Boil 4 cups sugar in 2 quarts water for 10 minutes; cool and add 1 gallon cold water; add the strained juice of 6 oranges and 1 dozen lemons, and 1 can grated pineapple. Serve with cracked ice. Slices of oranges and lemons and a little tart jelly may be added, if liked.

ICED TEA OR COFFEE.

Fill the glasses with cracked ice, and pour over it scalding hot tea or coffee. Tea may be served with sugar and slices of lemon, and coffee with sugar and whipped cream. These drinks may be made with cold tea or coffee, but lose much of their flavor.

LEMONADE, NO. 1.

Mrs. Katie Callahan.

Roll 6 lemons and slice thin; sprinkle over them 2 cups white sugar and let stand 15 minutes. Pour over them 1 gallon water, and add a lump of ice.

LEMONADE, NO. 2.

Allow 2 large juicy lemons for each quart water; shave off the thin yellow rind, put it in the pitcher with 2 tablespoons sugar to each lemon and mash the peel into the sugar; roll the lemons and squeeze the juice into the pitcher without the seeds; pour over 1 quart boiling water and set away to cool; ice and serve. Or pour cold water over, and stir till the sugar is dissolved, then serve.

Orangeade is made in the same way using less water.

MINT GINGER ALE.

Put 1 cup granulated sugar with the juice of 6 lemons in a bowl; when dissolved, add 6 stalks of mint bruised; half fill with crushed ice, put in 2 bottles ginger ale; stir till very cold, and serve.

TEA.

Scald the teapot letting it get quite hot; put in the tea, 1 teaspoon to each person and 1 to the pot, and at once pour over it $\frac{1}{2}$ the proper amount of boiling water, let draw a few minutes, fill up with boiling water and serve.

Russian tea is served with a slice of lemon in each cup.

BREAD AND BREAKFAST FOODS.

BAKING POWDER BISCUITS.

Mrs. Lawrence Walters.

For 1 quart flour, take 2 teaspoons baking powder, 1 tablespoon lard, a little salt, and 1 pint buttermilk. Mix and knead quickly, using the hand instead of the rolling pin to flatten the dough. Cut and bake in a quick oven.

BERRY CORNCAKE.

Mrs. T. A. Campbell.

Mix 2 cups cornmeal, 1 cup flour, 3 tablespoons sugar, 2 eggs, 1 teaspoon salt, 1 teaspoon soda in 1 pint sour milk, 1 cup of any kind of berries. Bake till a nice brown.

BOSTON BROWN BREAD.

Mrs. Sam Davis.

Mix 1 cup molasses, 1 cup cornmeal, 3 cups brown flour, 1 cup sour milk, 1 cup sweet milk, 1 teaspoon soda dissolved in hot water, butter size of an egg, and salt to taste. Steam 3 hours; bake 1 hour.

BREAD.

A.

Boil 2 small potatoes at noon; when well done, drain and mash, pouring the water back on them; when lukewarm, add 2 tablespoons sugar, 1 tablespoon salt, and 1 cake yeast foam; let stand in a warm place till time to set sponge in the evening, then take 5 pints warm water, and stir into it 2 sifters of flour and the yeast. Let rise over night; in the morning take 2 sifters flour, put in the bread pan, add $\frac{1}{2}$ cup salt, pour in the sponge, and mix with water enough to knead to a soft dough; cover and let rise in a warm place till very light; knead and let rise again; then knead into 4 loaves, put in pans, let rise again, and bake 1 hour. The surface of the dough should be greased with butter or lard each time it is left to rise.

BREAD MUFFINS.

Mrs. John E. Williams.

Make a setting as of bread at night with $\frac{1}{2}$ cake yeast. In the morning mix the yeast, 1 beaten egg, butter the size of an egg, a little salt, 1 pint milk, and flour enough to make a stiff dough; let rise once and roll out as thin as for biscuit, cut with a biscuit cutter, double together, let rise very light, and bake.

BROWN BREAD, NO. 1.

Mrs. John E. Brown.

Mix 5 cups graham flour, 3 cups buttermilk, 2 teaspoons soda, 1 teaspoon salt, $\frac{1}{2}$ cup molasses, and $\frac{1}{2}$ cup brown sugar. Bake in a slow oven 1 hour.

BROWN BREAD, NO. 2.

$\frac{1}{2}$ cup corn meal, 1 cup white flour, 1 cup molasses, 2 cups graham flour, $\frac{1}{2}$ pound seeded raisins, 1 pint sour milk, 1 teaspoon soda. Put into four 1-pound baking powder cans, perforate the lids, and steam 2 hours.

BROWN SCONES.

Heat 1 pint good cream, and as it gets hot dredge in brown flour until it makes a thick paste, season with salt; keep stirring till smooth. Turn out on a floured board, roll $\frac{1}{2}$ inch thick, cut in rounds and bake on a hot griddle, turning and baking both sides brown, but not scorched. If not crisp, put in the oven to dry out. Scones made with white flour should be served hot but not crisp.

BUCKWHEAT CAKES.

Beat $3\frac{3}{4}$ cups buckwheat flour and 1 teaspoon salt in a jar until smooth with 1 quart cold water; add $\frac{1}{2}$ an yeast cake and mix; cover and let stand in a warm place over night. Dissolve $\frac{1}{2}$ teaspoon soda in 2 tablespoons boiling water, add to the batter with 1 tablespoon sugar; beat, and bake. One cup wheat flour is an improvement instead of as much buckwheat. 1 cup of batter may be saved each day to start the cakes instead of fresh yeast, if made often enough.

BUNS, NO. 1.

Mrs. Pat. Dougherty.

Break 1 egg into a cup and fill up with sweet milk; mix with it $\frac{1}{2}$ cup yeast, $\frac{1}{2}$ cup butter, 1 cup sugar, and enough flour to make a soft dough. Flavor to taste with grated nutmeg. Let rise till very light, then stir in a few dried currants cleaned, mould into biscuits, let rise a second time in the pan, and bake. When nearly done, glaze with a little molasses and milk.

BUNS, NO. 2.

Mrs. Rose Call.

Boil 1 quart sweet milk and let cool. Soak 1 cake yeast in a cup of warm water. Mix together 1 cup lard, 1 cup sugar, the whites of 2 eggs beaten to a froth, flour enough to make a stiff batter, the milk and lastly the yeast. Let stand over night. Then add a little salt, and mix as bread. Make into small rolls and bake in a moderate oven.

BUNS, NO. 3.

Mrs. Wm. Breeze.

Boil 3 small potatoes in $1\frac{1}{2}$ pints water, and mash fine. When lukewarm, add $\frac{1}{2}$ cake yeast foam, and 1 tablespoon sugar. Let rise over night. In the morning, take 1 pint of this yeast, 1 pint water, $\frac{1}{2}$ pint sugar, and $\frac{1}{2}$ pint lard (part butter, if you have it), a small handful of salt; rub lard in flour, and mix till stiff. Let rise till light, about 4 hours; make into 40 buns, and place 2 inches apart; let rise till 4 or 5 times their natural size; then bake in a rather quick oven.

(BATH) BUNS.

Scald 1 pint milk, add 1 cup butter, let cool till only lukewarm, then add $\frac{1}{2}$ cup yeast and 3 pints sifted flour; let stand over night in a warm place. Beat $\frac{1}{2}$ cup sugar with yolks of 6 eggs, work into the sponge with 1 teaspoon cinnamon, $\frac{1}{2}$ cup chopped citron, and $\frac{1}{2}$ cup currants. Work in well with the hands, and add flour enough to roll out. Cut with a round cutter, put in greased pans, cover, and when very light bake in a quick oven 35 minutes.

BUTTERMILK BISCUITS.

Mrs. Alta Hoskins.

Sift 1 scant teaspoon soda and 2 teaspoons baking powder in 1 quart flour; add 2 tablespoons lard, 1 pint buttermilk, and a little salt. Mix very soft, and bake in a hot oven.

CINNAMON ROLLS.

Miss Joanna S. Holleran.

Take 1 quart light bread dough, mix with 1 cup sugar and 1 tablespoon lard; roll $\frac{1}{4}$ inch thick; spread with butter, sugar and cinnamon; roll as a jelly roll; cut slices 1 inch wide, let rise, and bake in a quick oven.

COFFEE CAKE, NO. 1.

Mrs. J. W. Evans.

Take 1 cup bread dough; add 2 tablespoons soft butter, 1 egg, 1 tablespoon sugar, $\frac{1}{2}$ cup currants. Beat and make into a soft loaf; let rise, roll out 1 inch thick, let rise again and bake. When done spread the top with 1 tablespoon milk and 2 tablespoons powdered sugar, and put back to brown.

COFFEE CAKE, NO. 2.

Soak $\frac{1}{2}$ cake compressed yeast in $\frac{1}{2}$ cup lukewarm milk; when dissolved add $\frac{1}{2}$ teaspoon sugar, and 1 saltspoon salt, then a large half-cup of sifted flour; mix thoroughly, cover and put in a warm place to rise for several hours. When ready, cream in a large bowl $\frac{1}{2}$ cup sugar and 3 ounces butter, with the grated rind of half a lemon or orange; then beat in $1\frac{1}{2}$ eggs until light, $\frac{1}{2}$ cup

milk, $\frac{1}{2}$ teaspoon salt, and $2\frac{1}{2}$ or 3 cups flour. When smooth and light stir in the risen dough, and knead well for 10 minutes. Cover and let rise several hours or all night. Roll small portions out the desired size, and put in buttered pans. When light again, spread melted butter evenly on top, dredge thickly with sugar and cinnamon, and, if wanted, finely chopped nuts, and bake till a light brown.

CONTINENTAL WAFFLES.

Mrs. Frank Grandy.

Beat 4 eggs separately; add a pinch of salt, $\frac{1}{2}$ pint milk, 1 teaspoon sugar, 1 teaspoon butter, and 2 teaspoons baking powder, with flour enough to make a thin batter. Bake on a hot, greased waffle iron.

CORN BATTER BREAD.

Miss Fillie Welton.

1 quart¹ fresh buttermilk, 1 scant cup cornmeal, 3 eggs, 1 small teaspoon soda, butter or lard size of an egg, a little salt. Bake quickly in a deep pan.

CORN BREAD, NO. 1.

Mrs. J. W. Holleran.

Sift 1 quart of cornmeal well with 1 cup flour; work in a large tablespoon lard, and 2 tablespoons sugar, salt to taste, 1 well beaten egg, and 2 cups sour milk.

CORN BREAD, NO. 2.

M. E. Kendall.

Add 1 teaspoon soda to 1 quart buttermilk, then 2 well beaten eggs, and 1 teaspoon salt, lastly 1 quart corn meal. Bake in a moderate oven in shallow pans.

CORN CAKES.

Mrs. John M. Stone.

Mix $1\frac{1}{2}$ cups corn meal with 1 cup flour, 1 egg, 2 tablespoons lard, $\frac{1}{2}$ teaspoon soda in the flour, 1 tablespoon syrup, a good pinch of salt, and $1\frac{1}{2}$ cups milk. First scald the corn meal with a little boiling water. Bake on a griddle.

CORN DODGERS.

Filippini.

Put 1 pint milk in a saucepan with 3 saltspoons salt, and as soon as it comes to a boil, scatter over it slowly $\frac{1}{2}$ pound cornmeal, stirring briskly. Let boil 6 minutes, stirring from the bottom occasionally. Mix in 1 ounce butter, 1 egg yolk, and a pinch grated nutmeg, turn into a dish to cool. Divide into 12 equal parts, put in a buttered pan in oval shapes, baste with a little butter, and set in a slow oven for 20 minutes. Take up, split half open, spread butter inside, and serve on a hot dish in a napkin.

Marion Harland.

Mix 1 quart buttermilk or sour milk with 2 eggs beaten light, 1 teaspoon salt, 1 teaspoon soda in hot water, 2 tablespoons molasses, 1 tablespoon melted lard, $\frac{1}{2}$ cup flour, and enough cornmeal to make a batter a trifle thicker than for flannel cakes. Bake on a griddle.

Mix $\frac{1}{2}$ teaspoon salt with $\frac{1}{2}$ cup cornmeal; sprinkle it over 1 cup boiling water in a double boiler, stirring very hard till smooth; add $\frac{3}{4}$ cup milk, and cook 3 hours, replenishing the boiling water in the under kettle as needed. Serve hot with sugar and cream or milk.

Cold mush may be cut into thin slices and fried brown in a little butter or dripping.

CORNMEAL PONE.

Marion Harland.

Mix 1 quart cornmeal with 1 teaspoon salt, a little melted lard, and cold water enough for a soft dough. Mould with the hands into thin oblong cakes, lay in a buttered pan, and bake very quickly.

An ash cake is a pone laid on the hot hearth, covered with hot ashes, and baked.

Break the salmon into flakes; season with allspice, nutmeg, salt and pepper; fill a mould with alternate layers of aspic jelly and salmon; turn out on a flat dish, and garnish with lettuce and hard boiled eggs.

SALMON LOAF.

Mrs. Isaac Brandt.

Mix well together 2 cans of salmon, 1 cup of rolled crackers, 3 eggs and 1 teaspoon melted butter. Bake $\frac{3}{4}$ hour in a deep greased pan, placed in a larger pan of water. Serve hot or cold with the following dressing:

Dissolve 1 tablespoon cornstarch in a cup of milk, boil and stir until it begins to thicken; stir in the oil from the cans of salmon and 1 egg; take from the fire, add the juice of $\frac{1}{2}$ a lemon and a little chopped parsley.

SALMON PATTIES.

Take $\frac{1}{2}$ can salmon, flake it and mix over the fire with rather more than $\frac{1}{2}$ pint of a good cream dressing; season with salt, pepper, anchovy sauce (if at hand), and a few olives chopped fine. Fill the hot patty cases, if served hot; if not, let cool before filling them.

DEVILLED SARDINES.

Prepare six pieces buttered toast. Put 2 split sardines on each piece. Spread a little French mustard on the sardines, sprinkle with 1 tablespoon bread crumbs, put 1 tablespoon butter over them in bits, place on a pan, and set in the oven for 10 minutes. Serve with quartered lemons on the dish.

SCALLOPS.

Scallops may be washed, drained and cooked 5 minutes in a cream sauce. Or they may be scalded, drained, dried, and dipped in egg, then in breadcrumbs, and fried in boiling fat.

SHAD ROE.

Filippini.

Take about $2\frac{1}{2}$ pounds fresh shad roes; put in a lightly buttered skillet with 2 tablespoons each white wine and sherry, $\frac{1}{2}$ tablespoon butter, $\frac{1}{2}$ teaspoon salt, 1 saltspoon each pepper and nutmeg. Cover with a lightly buttered paper. Put over the fire for 5 minutes, then in the oven for 35 minutes. Take out the roes carefully without breaking, place them on a large dish, put the pan on the fire, add $\frac{3}{4}$ cup cream, a little salt and cayenne, and let boil 5 minutes; add 2 egg yolks beaten up with 2 tablespoons cream, stirring briskly while heating for 3 minutes. Strain the sauce through a cheesecloth over the roes and serve.

SHAD ROE À LA NEWBURGH.

Plunge 2 shad roes of $1\frac{1}{2}$ pounds each in a quart boiling water, with 1 teaspoon salt and 2 tablespoons vinegar, and boil 10 minutes; drain, cut in 1 inch pieces, and finish as lobster, Newburgh, taking care not to break the pieces.

SHRIMPS WITH PEAS.

Mrs. John D. Martin.

Drain a pint can French peas, plunge in boiling water for 2 minutes, drain again and keep warm. Make a good cream sauce, add 1 can shrimps cut in halves, cook 5 minutes, put in the peas, get boiling hot and serve.

SOUSED STURGEON.

Mrs. Hugh Ewing.

Cut the fish in large pieces and put in an iron pot with water sufficient to cover it. Add a cup salt and tablespoon white

pepper, one of cloves and allspice mixed, a pinch of mace and a small bunch of sage tied in a thin rag, and put in before the fish. Let all boil until the fish is nearly done. Then add a quart of cold vinegar. It will jelly in 24 hours. A rock soured is delicious.

STEWED TERRAPIN.

Mrs. Rorer.

Put 2 liver terrapins in boiling water and boil 15 minutes. Pull off the outer skin and toe nails, put back in fresh boiling water, add salt, and boil slowly till the shells part easily. Take out, remove the under shell, and let cool off. Take them out of the upper shells; remove carefully the sandbags, bladders, thick intestines, and the gall sacks which are in the liver; throw these away. Break the terrapin into small pieces, cut the small intestines fine, put all with the broken up liver and the eggs. Add the liquor that has drained in cutting, roll $\frac{1}{2}$ pound butter in flour, and add it, and heat through. Mash the yolks of 6 eggs with 2 tablespoons sherry, stir it in with $\frac{1}{2}$ pint thick cream, salt and cayenne pepper. Let boil up once, take off, add 1 gill wine and $\frac{1}{4}$ teaspoon mace, and serve.

PLANKED WHITE FISH.

Mrs. J. W. Holleran.

Take a fish that weighs between 3 and 4 pounds, wash well, scrape and split clear down the whole length, removing the backbone without loosening the meat too much; tack to a plank, inside up, season with pepper and salt, and dot with bits of butter. Bake in the oven from 20 to 30 minutes, not letting it cook too long. Serve with quarters of lemon. It is that much better if it can be roasted before a clear fire.

Shad is good cooked in the same way.

MEATS.

AUNT BRIDGET'S FAMILY STEW.

Mrs. W. B. Ward.

Place in a roaster a layer of thin round steak, season with salt and pepper and dredge with flour. Slice a small onion over the meat, then a layer of sliced potatoes, again season and dredge, making as many layers as desired. Fill up the pan with water. Bake in slow oven about 1 hour, adding water as necessary.

BACON.

Trim the bacon all around and slice very thin crosswise. Broil over a moderate fire 2 minutes on each side. Serve immediately.

To fry bacon, get a very little butter hot in a pan, and fry the bacon 2 minutes on each side. Never let it stand.

BOILED BEEF.

Select a 4 pound piece of short ribs of beef. Tie it tightly and put in a pot with 4 quarts boiling water, 1 tablespoon salt, $\frac{1}{2}$ teaspoon pepper, 1 small scraped carrots, 4 small peeled turnips, 2 onions, and a bunch of soup herbs. Cover and simmer for 2 $\frac{1}{2}$ hours. Serve the vegetables on the same dish as the meat. Keep the broth for future use.

BRAISED BEEF.

Miss Johanna Feeney.

Put 1 tablespoon butter in a kettle over a good fire, and brown in it 1 sliced onion; put in 3 or 4 pounds solid lean beef, brown on both sides, then add 1 small carrot sliced, 1 cup canned tomatoes, and from 1 pint to 1 quart of water according to the size and tenderness of the meat. Boil slowly a couple of hours. Take out and serve with a gravy made from the liquor left in the pot.

BROILED BEEFSTEAK.

Mix 1 tablespoon melted butter with 1 teaspoon salt and $\frac{1}{2}$ teaspoon pepper; trim a small steak neatly and roll in this dressing; arrange on a broiler and broil over a good fire 6 to 8 minutes on each side, turning to avoid scorching. Serve with any dressing liked. Or broil without the previous dressing, browning both sides, but being careful not to cook through. Put on a hot platter, and baste both sides with butter, salt and pepper, pressing slightly to release the juices.

With certain gas ranges which do not permit of broiling properly speaking, a good substitute is to get a skillet quite hot, and put the steak in, searing it on both sides, and cooking as quickly as possible.

MINCED BEEF.

Cut 1 dozen thin slices from a thick sirloin steak. Dust with salt and pepper. Cut 6 Spanish red peppers in halves, and fry in 2 tablespoons hot butter for 2 minutes on each side. Take out to a hot plate. Put the beef in the pan and fry 1 minute on each side, take out with a fork and arrange on a hot dish the pieces overlapping, place the peppers on top, and sprinkle chopped parsley over them. Remove the fat from the pan, add 1 cup half water and half red wine, season with pepper and salt, boil for five minutes, pour over the beef and serve.

SPICED BEEF.

Put 2 pounds tender lean beef in a saucepan with 1 cup each of wine and water, 3 tablespoons vinegar, cinnamon, pepper, salt and onions; cover the saucepan tight; place over a slow fire for 2 hours; take the meat from the gravy and let cool. To be served cold.

STUFFED BEEFSTEAK.

Cut a large juicy beefsteak from the tender side of the round, pound it, season with salt and pepper, spread a stuffing as for fowls on it quite thickly and roll up, tying it securely. Put in a dripping pan and cover with cold water. Let it stew slowly for 2 or 3 hours, adding boiling water if more is needed. The gravy should not need thickening, but a glass of wine is a good addition. Serve with the gravy in a boat.

BEEF À LA BOURGEOISE.

Slice 1 pound or more of cold boiled beef quite fine and put in a baking dish. Brown 1 chopped onion in a little butter, sprinkle with 1 tablespoon flour and a little chopped parsley, stir well and add 1 tablespoon lemon juice, and 1 cup stock or hot water. Let boil a moment and pour over the meat; sprinkle with bread crumbs and bake $\frac{1}{2}$ hour in a moderate oven.

The lemon may be omitted and $\frac{3}{4}$ cup tomato sauce, or thick stewed tomatoes added.

BEEF À LA SAGERS.

Miss Beall Ewing.

Rub the bottom of a chafing dish or saucepan with garlic, melt in it 1 tablespoon butter; add 2 tablespoons wine, 1 tablespoon each catsup and Worcestershire sauce, and $\frac{1}{2}$ teaspoon salt. When cooking, put in thin slices cold roast beef, and serve when very hot.

BEEF CROQUETTES.

Chop fine any left over beef, add half the quantity of bread crumbs. Fry 1 finely chopped onion in a saucepan with $\frac{1}{2}$ tablespoon butter until brown, mix with the beef; also 1 teaspoon chopped parsley, 1 teaspoon salt, $\frac{1}{2}$ teaspoon white pepper, and saltspoon grated nutmeg. Crack in 2 raw eggs, and 2 tablespoons cream, and mix hard for 5 minutes. Let stand till well set, then roll out into croquettes, roll in flour, and fry in a skillet with a little lard or butter. Turn, remove, drain, and serve with horse-radish sauce around them.

BEEF DUMPLING.

Mrs. John White (Plummer Hill).

Make a paste as for pie; peel and slice 2 large onions and 2 large potatoes, cut 1 pound beefsteak in small pieces, dust with salt and pepper, fill in the paste, tie up in a floured cloth, and let boil for 2 hours.

BEEF EN CASSEROLE.

Miss Johanna Feeney.

1 pound tender side of the round of beef cut in $\frac{1}{2}$ inch pieces; fry brown in butter in a saucepan; have a casserole ready, put in 1 dozen button onions, a couple raw potatoes, 1 stalk celery, and 2 small carrots all coarsely diced; turn in the meat and gravy, pepper and salt to taste, cover with the lid and bake 2 hours. When done, brown 1 tablespoon flour with 1 tablespoon butter in a hot saucepan and mix through the stew. Brown stock may be used to advantage in place of water, and brown gravy stirred in instead of the browned flour.

Tough meat or fowl of any kind is improved by long baking in a casserole.

BEEF HASH.

Dice any left over roast or boiled beef, and half the quantity of cold sliced potatoes. Brown a finely chopped onion with a little butter in a saucepan, add the beef and potatoes, season with salt and pepper, and add a cup of white broth or hot water. Cover and stew a few minutes, then remove to the oven and bake 30 or more minutes. Remove to a covered dish, sprinkle chopped parsley over and serve. Or dress on a baking dish, sprinkle with bread crumbs, baste with butter, and brown for 10 minutes in the oven. The onion may be omitted, if desirable, and cold rice is quite as acceptable as potatoes. Tomato juice from a can is better than water, and left over cooked tomatoes (unless sweetened) make a good addition, as do small quantities of many cooked vegetables. A mixture of cold meats is also good.

BEEF LOAF, NO. 1.

Mrs. P. R. Sines.

Take 1 pound raw lean beef chopped fine, 1 cup chopped suet, 1 cup rolled cracker crumbs, 2 eggs beaten light, 1 cup sweet milk,

BEEF ROASTED IN THE OVEN.

Put in a very hot oven, baste every 10 minutes, turn several times, and cook 15 minutes to each pound. Take up on a hot platter, and garnish with hot boiled rice or potatoes roasted in the pan, or Yorkshire pudding. Pour the liquid out of the pan except about 2 tablespoons, add 1 tablespoon flour to the pan and mix till smooth, add 1 cup hot water, stir till it boils, then add salt and pepper to taste, and serve in a gravy boat.

Make a good piecrust with either lard or very finely minced suet, take the pie out, edge the pan with a narrow strip of paste, wet the edge with cold water, and put on a top cover, pressing down the edge tight. Make a good hole in the centre, and bake till the crust is done. If the water has boiled off when the crust is put on, add a little boiling water. A beef's kidney, sliced very thin, is considered a good addition by some.

BEEFSTEAK ROLLS.

Cut 2 pounds beef from the tender side of the round in slices about $\frac{1}{2}$ inch thick; cut these up in pieces the size of one's hand. Chop 1 pound sausage meat with a few sprigs of parsley, and place 2 tablespoons on each piece of beef; roll the steaks and tie both ends with thread. Let them brown in butter in a skillet, then add the juice of 1 lemon, 2 cups brown stock, 2 sliced carrots and onions, salt and pepper to taste. Cover the pan and cook about 2 hours. Put the rolls on a warm platter, cut away the threads, and strain the gravy over them. Serve with mashed potatoes and a good salad.

Take 2 pounds lean beef from the shoulder; chop fine; soak $\frac{1}{2}$ pound bread crumbs in milk till soft; mix with the beef. Make the mixture into cakes with the hands, roll in flour and fry in a little hot butter in a skillet for about 10 minutes. Take out but keep hot. Rub into the pan 2 tablespoons flour, add 1 pint milk, 1 tablespoon Worcestershire sauce, and let boil a few minutes. Pour this over the meat, and bake in the oven till brown.

Cover the saucepan and simmer 2 hours. When half done add 1 teaspoon salt. Sift 1 pint flour twice with 1 heaping teaspoon baking powder, and $\frac{1}{3}$ teaspoon salt; add enough milk (a little over $\frac{1}{2}$ cup) to make a soft dough. Do not work it much. Drop by small spoonfuls over the top of the meat; cover quickly, push back the saucepan and simmer 10 minutes without uncovering the stew. Serve at once.

When the flour is a light brown and has formed a crust, take out, add a lump of butter, stir it through several times, and you will have a delicious hash.

GREENS.

Many young plants in early spring may be picked in lawns and pastures and cooked like spinach, making wholesome and delicious greens. Dandelions are among the earliest. Cut off the stems, flower stalks and dead leaves, wash the green leaves through several waters, and boil several hours, changing the water at least once, and salting the last water. Drain, season with butter, pepper and salt, and serve; or fry several minutes with a few slices of bacon in a skillet. The long leaves of the curly or narrow dock will cook in much less time, and reduce the bitterness of the dandelion. The young shoots of poke come next. They should be gathered when just appearing above the ground; after 4 inches they are unwholesome, though the tops may be used when somewhat larger. These should cook within an hour, changing the water several times. Serve as greens, or on toast as asparagus.

with a cream sauce. Later the young shoots of wild mustard and cress appear in the garden and lamb's quarter which, however, must be carefully watched for insects, the sprouts from old turnips, the leaves of fresh radishes, and young beets with their roots. If the greens are mixed, allow at least 2 hours of hard boiling in salted water, and serve as you like spinach. A piece of salt pork may be boiled with dandelions or beets.

A couple of tablespoons of grated cheese, either American, Swiss or Parmesan, or mixed, may be stirred through before serving, or a good cream sauce may be prepared and the drained macaroni put in this to heat through. Here again the grated cheese may be added. Thick stewed tomatoes may be placed in the dish around the plain macaroni, or a regular tomato sauce around or mixed through the more elaborate dishes. Polish crumbs sprinkled on top are a good addition. Olive oil may always be used in place of butter.

RICE, NO. 1.

Pick over and wash one cup of rice. Put in double boiler and fill with cold salted water. Boil about $\frac{1}{2}$ hour, or until dry. Do not stir. It should turn out with the kernels separate and whole. If not boiled dry when done, turn into a colander and stand on a pan in the oven with the door open for 5 minutes. Then serve immediately. It makes a good dressing on a platter, with roast meat in the centre, or a roast or stewed chicken.

Peel the tomatoes without scalding. Serve sliced or whole in any manner to suit the taste—plain, or with an onion sliced with them; on lettuce leaves or in a saucedish, with French dressing, any kind of mayonnaise or other dressing, with salt or sugar, with vinegar or without. They are ornamental as well as good with the centres scooped out and filled with nicely seasoned, chopped onions, or with peppers and onions, or with celery chopped and mixed with mayonnaise dressing, with or without lettuce leaves. FILIPPINI SALAD DRESSING.

Mix in a cold soup plate 1 level teaspoon curry powder, $\frac{1}{2}$ teaspoon French mustard, 1 saltspoon ground mustard, 1 saltspoon cayenne pepper, 1 teaspoon finely chopped parsley, $\frac{1}{2}$ teaspoon chives, 2 chopped shallots, a suspicion of garlic, 4 teaspoons salt, 1 teaspoon white pepper, and the finely chopped rind of $\frac{1}{4}$ of a lemon. (For the herbs that are difficult to obtain, a few drops of onion juice will answer.) Mix well with a fork, add 1 tablespoon olive oil, and mash the whole with the fork until almost a pulp, gradually adding 1 tablespoons white wine vinegar. Mix up well, pour into a bowl, and add olive oil and vinegar slowly in the proportion of 2 to 1, beating continuously until 1 quart is reached. Press through a strainer into a glass jar, cork or seal and keep in a cool place. This will keep a good while, and is used principally to season plainer dressings. If desired, melted butter and whipped cream can be used in place of the oil, and the curry powder may be omitted. Always shake well before using.

Mix well together 3 tablespoons olive oil with 1 tablespoon vinegar, salt and pepper. Keep cold till wanted.

GREEN MAYONNAISE.

If the oil should curdle, begin again with a raw yolk, and gradually stir in the curdled dressing. Do not add much of either oil or vinegar at one time, and very little vinegar suffices if a thick dressing is wanted. The dressing may be flavored with onion juice, tarragon vinegar, or a few drops of tabasco; and more or less whipped cream may be added. The ingredients should be cold when mixed, and the dressing kept in a cool place till wanted. Will keep some days.

STRAWBERRY SHORTCAKE, NO. 2.

Miss Tessie Hinzy.

Sift $1\frac{1}{2}$ teaspoons baking powder in $1\frac{1}{2}$ cups flour, and rub in a good sized lump of butter. Roll out thin, and cut into 2 layers the size of your pan. Put one in the pan, butter it, put the second one on top, and bake. When done, take them apart and put sugared berries between and on top.

STRAW PUDDING.

Mrs. C. H. Furman.

Make some good noodles and cut very fine; butter a pudding dish well, put in a layer of noodles, then a layer of sugar and cinnamon, cocoanut and raisins; beat the whites of 3 eggs to a stiff froth, dot with it, make 4 layers, ending up with the eggs. Bake in a slow oven 1 hour.

SUET DUMPLINGS.

Mrs. Isabel Lawson.

Sift together 1 cup flour and $\frac{1}{2}$ teaspoon baking powder; add 1 cup grated bread crumbs, 1 cup finely chopped suet, $\frac{1}{2}$ cup sugar, 2 well beaten eggs, 1 pint milk and a large pinch salt. Form into a smooth batter and drop it by tablespoonfuls into a quart of boiling milk, three or four at a time. When done dish and pour over them the milk they were boiled in. A Danish dish.

SUET PUDDING.

Miss Mabel West.

Rub together $\frac{1}{2}$ cup chopped suet and $\frac{1}{2}$ cup sugar; add 2 table-spoons molasses, 1 teaspoon each of cloves, cinnamon and nutmeg; 1 teaspoon soda dissolved in $\frac{1}{2}$ cup sour milk; 1 cup each of currants and raisins; $\frac{1}{2}$ cup chopped English walnuts, and 2 table-spoons brandy. Pour in a greased mould, cover and steam $1\frac{1}{2}$ hours. Serve with lemon sauce.

SWEDISH PUDDING.

Mix well in a bowl 1 tablespoon thick honey, 2 ounces bread crumbs, 1 tablespoon sugar, $\frac{1}{4}$ of the grated rind of a lemon and the juice, 1 egg, $\frac{1}{2}$ ounce butter, 1 ounce flour, $\frac{1}{4}$ cup cold milk, and 1 tablespoon kirsch. (Cherry juice with a little almond extract would take the place of the kirsch.) Mix thoroughly, then add the beaten white of 2 eggs, and put in a pudding mould. Put in a deep pan of boiling water in the oven for 30 minutes. Turn out on a hot dish and serve with hot maple syrup poured over it.

SWEET POTATO PUDDING.

Pare $\frac{1}{2}$ pound sweet potatoes and grate them; beat $\frac{3}{4}$ cup butter to a cream with 1 cup sugar, and add 8 well beaten eggs; stir in the potatoes, the juice and rind of 1 lemon and 1 orange, $\frac{1}{4}$ teaspoon mace, 1 even teaspoon cinnamon, and $\frac{1}{2}$ teaspoon salt; turn into a buttered dish, and bake in a moderate oven $\frac{3}{4}$ hour. Serve hot or cold with sauce.

$\frac{1}{2}$ cup sherry and 2 tablespoons brandy are a good addition, if you use liquor.

SYLLABUB.

Add 1 gill wine, the juice of 3 lemons, the beaten whites of 6 eggs, and sugar to taste to 1 quart of cream which has been well chilled. Whip stiffly and serve in glasses with cake.

TAPIOCA.

Mrs. J. W. Brumage.

Instead of soaking tapioca before cooking, put directly into boiling water or milk, and it will have less of a starchy taste.

TAPIOCA PUDDING, NO. 1.

Mrs. Joe Winefordner.

Soak 1 small cup of tapioca $\frac{1}{2}$ hour on back of stove, drain, put in a double boiler with $1\frac{1}{2}$ pints milk and boil 30 minutes. Beat the yolks of 2 eggs hard, add 1 cup of sugar, a little salt, and vanilla or lemon flavoring. Pour the pudding into the eggs, stir well, turn into buttered pudding dish, and bake 30 minutes in a slow oven. Make a meringue of the whites of the eggs and 2 tablespoons of sugar, flavoring as desired, and put back in the oven to brown. This pudding is good with a meringue top without the baking.

TAPIOCA PUDDING, NO. 2.

Mrs. James Monahan.

Soak 6 tablespoons tapioca 6 hours. Scald 1 quart milk, then add the tapioca, the yolks of 3 eggs, and $\frac{1}{2}$ cup sugar. Stir and cook until thick. Remove from the fire, flavor with lemon extract, and add the well beaten whites of the eggs. Serve hot or cold.

Mrs. Kemper.

Soak 1 cup tapioca over night; add 1 cup sugar, $1\frac{1}{2}$ cups water, the juice and grated rind of 1 lemon, and cook until clear. Add the stiffly beaten white of 1 egg. Pour into a dish, and spread over the top a frosting of the whites of 2 eggs and 3 tablespoons sugar, and serve very cold with cream.

TRIFLE.

Soak sponge cake in sweet wine. When soaked drain off the excess. Make a custard of a pint of cream, yolks of 3 eggs and white of 1, sugar to taste and grated lemon peel. When cool, pour over the cake, beat the whites with sugar and lemon juice and pile up over the dish.

If you do not use wine, orange juice will do, also any stale, delicate cake without icing.

VANILLA CUSTARD.

Beat together briskly 2 eggs and 2 tablespoons sugar; add 1 cup milk and a few drops vanilla. Use it uncooked to add to bread puddings.

WASHINGTON PUDDING.

Mrs. H. B. Denman.

Cut cubes of dry bread twice as thick as a thick slice of bread. Cut off all crusts. Soak for several hours in a mixture of beaten yolks of 2 eggs, 1 quart milk, sweetened to taste, and flavored with nutmeg and vanilla. Fry in a skillet with butter, turning the cakes, or in a deep pan of boiling fat or lard. Serve hot with a large lump of hard sauce on each.

WHIPPED CREAM.

Mrs. Wm. Horden.

Chill $\frac{1}{2}$ pint thick cream, and add to it $1\frac{1}{2}$ tablespoons pulverized sugar, and 1 teaspoon vanilla. Put in a bowl set in a pan of cracked ice, and beat with a wire egg beater until quite stiff. Pour off any unwhipped cream in the bottom of the bowl. Set in a cold place until wanted. A syllabub churn can be used, if preferred, or if neither is at hand, a couple of silver forks will answer.

Whipped cream is used as a sauce for various jellies and delicate desserts, or with rich, frozen desserts, or served by itself as a dessert with cake. Flavored with many liquors or flavorings, it takes the name, as a sauce, of the liquor used. Packed in a mould and frozen for several hours, it makes every variety of mousse.

WIGWAM.

"The Housekeeper's Friend."

Open 1 pound of lady fingers and spread on a dish; cover them with currant jelly, and on the jelly spread meringue, then other

layers of lady fingers, jelly and meringue; make each layer a little smaller in order to have a pyramid. Cover the whole with meringue and put in the oven a moment to brown. Do not make the meringue too stiff.

WINE JELLY.

Mrs. A. W. Pitzer.

1 box Cox's gelatin soaked in a pint of cold water 1 hour. Then add 1 good pint of sugar, 2 quarts boiling water, juice of 2 lemons, and 1 pint sherry wine. Put in an egg shell, let all come to the boil, then strain and put in a cold place 12 hours. This will serve 10 or 12 persons.

In summer, use less boiling water.

YANKEE.

Mrs. Thomas Ewing.

Cut medium slices of stale bread, cutting off crusts or not, as preferred; butter on both sides, and fry in molasses. Serve hot. The molasses must be hot when the bread is put in, or it will soak in too much; but it must not be fried too fast for it should get gummy and most particularly not burn. Syrups left over from preserves and rich, sweet pickles make a good imitation Yankee.

PUDDING SAUCES.

BRANDY SAUCE.

Boil $1\frac{1}{2}$ tablespoons granulated sugar in $\frac{1}{2}$ cup water, with the rind of $\frac{1}{4}$ lemon; add $\frac{1}{2}$ tablespoon butter, and $2\frac{1}{2}$ tablespoons brandy, remove, and beat briskly a few minutes. Take out the lemon and serve. Use with steamed puddings.

Good with hot puddings and over vanilla ice cream.

CHOCOLATE SAUCE.

Melt 2 ounces grated chocolate in a saucepan; add 1 cup hot milk and boil for a couple of minutes, stirring. Beat together 2 heaping tablespoons sugar with the yolks of 2 eggs and $\frac{1}{4}$ teaspoon vanilla. CIDER SAUCE.

COFFEE SAUCE.

Grind 1 tablespoon freshly roasted coffee and add it to $\frac{1}{2}$ cup boiling milk. Cover the saucepan and let boil 2 minutes; stand aside for 10 minutes. Beat up the yolks of 3 eggs with 2 tablespoons sugar, strain the coffee through a cloth into the egg, add $\frac{1}{2}$ cup cream, beat well and put over the fire stirring hard for five minutes. Do not let boil. Strain if necessary when taken up, and serve immediately with a hot pudding, or French pancakes.

HARD SAUCE.

Beat to a cream granulated or pulverized sugar with $\frac{1}{2}$ the quantity of butter. Add vanilla to taste and a little nutmeg or ground mace, dusting the top with nutmeg. ORANGE HARD SAUCE.

Make a hard sauce of butter and sugar; flavor with the juice of 1 orange and as much of the grated yellow rind as is liked, or with orange essence if preferred. Slit the peel of a good orange half way down in several places, work the orange out, fill with the sauce, round it off smoothly, and turn under the tips of the sliced rind.

PEACH SAUCE.

Take 1 pint canned peaches, press through a sieve with their liquor, add 1 tablespoon each of maraschino and kirsch (or cherry bounce), or $\frac{1}{4}$ teaspoon almond extract. Get very hot without letting it boil. Serve with hot puddings. Apricot sauce is made the same way.

Filippini.

Beat until light 1 heaping tablespoon granulated sugar with the yolks of 2 eggs. Scald in a saucepan 1 cup cream and milk mixed; when at the boil add $\frac{1}{2}$ teaspoon vanilla, and pour gradually over the eggs and sugar, stirring continuously. Set back on the stove and get very hot without boiling, stirring all the time. Strain through a cheesecloth into a hot sauceboat, and serve with hot puddings.

PASTRY.

PIE PASTE.

Mix $\frac{1}{2}$ teaspoon salt with $1\frac{1}{2}$ cups flour; work in $\frac{1}{4}$ cup lard with the tips of the fingers; moisten with cold water till a dough is formed. Dredge a board with flour, place the dough on it, pat and roll out; wash $\frac{1}{4}$ cup butter, make into a round cake, and fold it into the paste; pat again; repeat this. If not to be used at once, wrap up in cheesecloth, put in a covered tin, and keep in a cold place.

Good paste may also be made entirely of lard, but rarely of butter alone.

PUFF PASTE.

Sift 1 pound flour on a board; make a hole in the centre, and pour into it 1 cup ice water and $\frac{1}{2}$ teaspoon salt. Knead well until perfectly mixed. Then let rest 15 minutes. Wash 1 pound butter in 1 quart ice water, then knead it out well flattening with the hand, and put in a cool place. Flour the board and roll out the paste to $\frac{1}{2}$ larger than the butter; put the butter on top, cover it with the 4 corners, and roll out to a square 1 inch thick. Then fold it in 3 folds without separating. Roll out again to a square a little thinner. Fold up and place on a pan, cover with a towel and put in a cool place for 20 minutes. Roll it out square as before and fold again, letting rest another 20 minutes. Roll out again, fold as before and put in a cool place until wanted.

ALMOND PUDDING.

Mrs. Ralph Wilson.

Mix together 6 well beaten eggs, 4 tablespoons powdered sugar, 1 teaspoon rosewater, 3 tablespoons powdered cracker, 4 tablespoons melted butter, 4 ounces finely shredded citron, and lastly $\frac{3}{4}$ pound sweet almonds, blanched and chopped fine. APPLE CAKE.

Mrs. Margaret A. Sayers.

Peel, core and slice 1 dozen good sized apples, put them in the pan with 1 cup raisins or currants, 1 cup sugar, 1 teaspoon vanilla, $\frac{1}{2}$ teaspoon cinnamon or nutmeg, and bits of butter amounting in size to a walnut. Cover with a second crust, but have the lower crust large enough to roll over the edge of the upper one. Bake in a moderate oven.

APPLE PAN PIE.

"The Ladies' Home Cook Book."

Take a deep earthen pudding pot, fill it with slices of tart apples, pour on enough molasses to sweeten them; sprinkle over them a little cinnamon, cover with a paste, cut a hole in the middle, and place in the oven. After the first paste is baked, it may be taken off and a second one baked. This should also be taken off, and the apple stay in till it becomes a deep red. When done, take from the oven and immediately break the paste into small pieces, and stir into the sauce while hot. Serve cold.

APPLE PIE.

Stew a dozen tart apples; when soft add 1 tablespoon butter, 1 cup sugar, $\frac{1}{2}$ glass rosewater, and a little nutmeg. Fill a freshly baked crust, and serve cold.

APPLE TARTS.

Pare, core and slice 6 sound apples. Put in a saucepan with 1 tablespoon butter, 3 tablespoons sugar and a little vanilla. Cover and cook slowly for 30 minutes, or until tender. Rub through a sieve, and let cool. Roll out puff paste $\frac{1}{2}$ inch thick, cut 12 pieces 3 inches square, wet the surface of 6 with beaten eggs, divide the sauce over them, cover with the remaining pieces, and pinch the edges together. Glaze the surfaces with egg, dust with granulated sugar, and bake for 20 minutes.

DRIED APPLE PIE.

Stew dried apples with a piece of lemon peel till tender, and rub through the colander. Sweeten to taste, add a pinch of nutmeg or cinnamon, and, if liked, a well beaten egg. Bake with two crusts, and serve warm.

FRIED APPLE PIES.

"The Ladies' Home Cook Book."

Mix 1 tablespoon lard, 1 quart flour, 1 tablespoon yeast, and water to form a stiff batter, and let stand till light. Add a very little soda, and knead up not very stiff; roll out the paste, cut in rounds with a saucer, lay a spoonful of freshly made apple sauce either green or dried on one-half the crust, fold the other over, pinch the edge, and fry in hot lard.

SLICED APPLE PIE.

Mrs. Thos. Coughtrie.

Make a good puff paste, roll $\frac{1}{4}$ inch thick, cut into 2 inch squares, and place a lump of the mixture on each. Pinch 2 opposite corners of the dough together, and press down flat; wash the remaining corners with water, and put as much powdered sugar on as will stay. Bake in a slow oven.

BLACKBERRY GRIDDLE CAKES.

Mrs. H. D. Lewis.

Make a dough not quite as rich as for pie; roll out in a large sheet, cover one-half thickly with blackberries, turn the other half of the dough over it and press down the edges tight. In Wales this would be baked on an immense griddle over the grate, and turned over. In default of griddles of the proper size, bake in the oven until done. Take out, turn back the top crust, spread the berries over the whole sheet, sprinkle with sugar and bits of butter, cut in squares, and serve on separate plates.

Sliced apples may be used in the same way.

BLACKBERRY PIE.

Mrs. Joseph Reid.

Pick over the berries, wash if necessary, line a pie pan with good paste, put in the berries, sprinkle well with sugar, put on a top crust, slash it across the middle, pinch around the edges and bake in a moderate oven. Dust the top with sugar when serving hot or cold.

Other berries and small fruits may be treated in the same way. A crossbar of paste is good with a berry pie.

BLUEBERRY PIE.

"Boston Cooking School."

Slightly dredge $2\frac{1}{2}$ cups berries with flour, and fill a pie pan lined with paste; sprinkle with $\frac{1}{2}$ cup sugar, and a pinch salt. Cover with paste, and bake in a moderate oven about 45 minutes.

Mrs. Clara Stephenson.

1 cup sugar, 2 cups buttermilk, 2 eggs, 2 tablespoons flour, a little butter, and flavoring to taste. Bake with 1 crust.

Put 1 spoonful rennet in 1 quart new milk; keep near the fire, and when the curd forms, drain off the whey through a sieve. Rub into the curd 4 tablespoons powdered sugar, $\frac{1}{2}$ cup butter, 1 grated nutmeg, and the yolk of 1 egg; beat well, add 1 whole egg and beat again. Mix in $\frac{1}{4}$ pound dried currants, or the grated rind and juice of 1 lemon. Line patty pans with a rich paste, half fill, dust with sugar and bake.

Mrs. Charles Breeze.

Put 2 cups of milk on to boil in a double boiler. Add 3 tablespoons chocolate or cocoa, $\frac{1}{2}$ cup sugar, butter the size of a small egg, 2 tablespoons cornstarch dissolved in a little cold milk. Stir well until it begins to thicken, then add the yolks of 3 eggs well beaten, cook a moment longer, take from the fire, add 2 teaspoons vanilla, and pour into a freshly baked pie crust. Make a meringue of the whites of the eggs with 3 tablespoons sugar, spread over the pie, and return to the oven to brown.

with 6 tablespoons sugar, take from the fire, add vanilla to taste, and the yolks of 2 eggs well beaten. Pour into a freshly baked crust, and spread on a meringue of the whites of the eggs, and $\frac{1}{2}$ cup sugar. Brown.

COCOANUT PIE, NO. 1.

Grate 1 cocoanut; take its weight in sugar, $\frac{1}{2}$ its weight in butter, 5 eggs, the milk of the nut and 1 pint milk, grated peel and juice of 1 lemon. Beat the eggs and sugar together, add the milk and melt the butter and put in. Line 4 pie pans with paste, fill and bake.

COCOANUT PIE, NO. 2.

Mrs. A. H. Flowers.

Put 1 quart milk and 1 pint water on to boil, reserving enough to wet 3 tablespoons flour; sweeten to taste; beat the yolks of 3 eggs light, stir in the flour and water, and add to the boiling milk; stir till smooth, then add the most of $\frac{1}{2}$ box cocoanut. Have 3 freshly baked crusts, fill, cover with a meringue of the whites of egg beaten stiff with a little sugar, sprinkle with the rest of the cocoanut, and brown in the oven.

COCOANUT STRUDEL.

Mrs. C. H. Furman.

Take 1 quart flour, 1 tablespoon lard, a pinch of salt, and enough water to make a soft dough, but not sticky. Knead and slap it very hard; let rise covered in a warm place $\frac{1}{2}$ hour. Prepare all the ingredients so they can be added without delay. Cover a table with a clean cloth, flour it well, put the dough in the middle and stretch it first one place and another till as thin as tissue paper. The edges will always be thicker than the rest; when stretched as far as it will go, cut off the edges with a sharp knife, and scatter the ingredients over the sheet; first a thin dusting of fine bread crumbs, then a heavy sprinkle of cocoanut, cinna-

mon, sugar, poppy seed, bits of butter, dots of jelly, raisins, and lastly white of egg beaten very stiff. Do this quickly or the dough will dry. Take one side of the tablecloth in your fingers, and roll the dough up like a jelly roll—it is too delicate to roll with the hands—if too long for the pans, cut the roll in shorter lengths; put in a buttered pan, and bake in a slow oven. Cut in slices to serve.

If the dough sticks in stretching, wet the edges with lard.

For Apple Strudel use less cocoanut and considerable grated apple.

COVENTRY PUFFS.

Roll puff paste into a sheet $\frac{1}{4}$ inch thick; cut rounds 3 inches across. Put a teaspoon preserves on each, turn up the edges in 3 places so as to form a triangle. Pinch tight, put bottom side up in a buttered pan, wash over with egg and water, dust with powdered sugar and bake.

Stir together $\frac{1}{2}$ cup sugar, piece of butter the size of a walnut, 1 small half cup of flour, 1 tablespoon cold milk and the yolks of 2 well beaten eggs. Mix thoroughly and add to the milk when it boils. Stir until it thickens. Take from the fire, flavor with vanilla, and fill the baked crusts with the custard. Beat the whites of the eggs with 2 tablespoons of sugar, cover the top of the pie, and brown slightly in the oven.

To make a chocolate pie add 2 tablespoons cocoa or 1 tablespoon grated chocolate to the custard.

CREAM PIE, NO. 3.

Mrs. Robert McGuire.

Put a pint of milk in a double boiler; bring to the boil. Beat together the yolks of 2 eggs, $\frac{1}{2}$ cup sugar, 2 tablespoons flour, and stir into the boiling milk, cooking till thick. ICE CREAMS, SHERBETS, ETC.

HOW TO FREEZE.

Get a good freezer and keep it clean. Use rich cream without gelatine or glaze, when it can be gotten; if not, rich fruits with milk are almost as satisfactory. Scald the milk or cream, and dissolve the sugar while hot. Thin flavorings may be added before freezing; crushed fruits, nuts, etc., when partly frozen. Put in the mixture, fill around the sides with crushed ice and coarse salt in layers, using plenty of salt. Turn the crank slowly and steadily till it gets stiff; here put in the fruit or coarse flavoring, and turn till it becomes too hard. Take out the dasher, stir the cream thoroughly, and, if whipped cream is added, stir it through now. Cover the can, cork it tight, put a buttered strip of muslin around the joint, drain off the water, and repack with ice and salt over the top of the can; cover the freezer with a heavy cloth, and let stand in a cool place from 1 to 2 hours to ripen, according to the ingredients of the cream. If wanted in moulds, fill them when ready to repack, and bury them in salt and ice the same way.

Ices take longer to freeze, and will melt more quickly. Always have them as stiff as possible before packing. When the dasher comes out, the beaten white of egg should be stirred in, if any is used. Frozen whipped creams require 3 or 4 hours to ripen, but only need to be packed, so they can be made without a regular freezer; in severe winter weather it is only necessary to set the mould outdoors for several hours.

ANGEL PARFAIT.

Turn this over 4 quarts of whipped cream, mixing well together. Pack in freezer for 4 hours. $1\frac{1}{2}$ quarts of thick cream before whipping will make the amount.

BISQUE ICE CREAM.

Prepare the cream and sugar as for vanilla ice cream; half freeze it, stir in 1 teaspoon each of vanilla and caramel, $\frac{1}{4}$ pound powdered macaroons, with a few kisses and lady fingers, and 5 tablespoons sherry; beat till smooth, take out the dasher and pack.

CAFÉ MOUSSE.

Add 1 gill black coffee to 1 quart thick cream, and $\frac{1}{2}$ cup powdered sugar; whip very stiff, turn into a mould, pack in salt and ice, and freeze 3 hours. This is good whatever becomes of it.

Any canned or fruit juice may be treated in this way, sweetening to taste, remembering that some sweetness is lost in freezing.

CARAMEL ICE CREAM.

Make a caramel of $\frac{1}{2}$ cup sugar, pour into 1 pint hot milk, and when dissolved add $\frac{1}{2}$ pound sugar, stirring till dissolved. When cold, mix with 1 quart cream and 1 tablespoon vanilla, and freeze till stiff; take out the dasher, stir in 1 pint whipped cream, repack, cover and let ripen 2 hours.

Any variety of ice cream may be converted into a parfait in this manner.

WATER ICES.

When fruit juices are frozen with water and sugar they are called "water ices"; if, when half frozen, a white of egg is stirred in, they become "sherbets". If served only half frozen without packing, the drink is "frappé". Canned or fresh juices may be used; the fresh fruit may be boiled or only mashed, but it must be strained, and sweetened to taste. If good material is used, and put together with judgment, the ice will be good whether frozen successfully or not.

CANDIES.

The common terms that are used to describe the stages of heat reached by the boiling sugar in candy making are the "thread" or "string," from 215° to 217° F.; the "soft ball," 238°; the "hard ball," 248°; and the "crack," about 50° higher. The test is made by dropping a teaspoonful of the syrup in cold water. The "thread" strings from the end of the spoon; the "soft ball" will just keep its shape; the "hard ball" hardens, and the "crack" is brittle. At 350° F., the syrup becomes quite brown and smokes. This is the "caramel" stage.

BARLEY SUGAR.

Soak 1 pint barley over night; in the morning simmer in more water until as clear as thin jelly; strain, add 1 pound white sugar and juice of 1 lemon; boil again till it reach the hard ball. Take from the stove, whip in the stiff white of 1 egg, and pour in buttered pans. When cold enough mark in squares.

BONBONS.

Bonbons are made of fondant, cooked or uncooked. Any flavoring or coloring desired may be added to the boiled fondant just before taking from the fire; and cocoanut, chopped nuts or chopped fruits may be worked in while yet soft. When well worked make up into small balls of any size or shape. Whole nuts or candied fruits are rolled in fondant, and all bonbons are put aside to ripen. They are then dipped in colored or white melted fondant, or in melted chocolate.

To color the outside of bonbons, melt boiled fondant over boiling water, color and flavor as desired, drop the bonbons in one at a time, turn with a two tined fork until covered, remove with the fork, and drop on buttered paper to harden. For covering with chocolate, melt Baker's chocolate over boiling water, and dip in the same manner. The chocolate may be sweetened if preferred, or sweetened chocolate may be used.

BURNT ALMONDS.

"Yonkers H. H. Cookbook."

Put 2 cups brown sugar into a saucepan with very little water. Stir until dissolved. Let it boil a minute and then throw in 1 cup blanched almonds and stir until the sugar forms caramel. When the nuts are well coated, turn them out and separate them.

Mix together 3 pounds sugar, $\frac{1}{2}$ cup molasses, 1 heaping cup butter, and $\frac{1}{2}$ teaspoon cream tartar. Boil until it cracks dropped in cold water. Flavor and pour into buttered pans.

BUTTERSCOTCH, No. 2.

Put 3 cups granulated sugar in a saucepan with 1 cup water, let it boil about 10 minutes without stirring. When the syrup changes from white to straw color, stir in 2 tablespoons butter, and pour into buttered pans, marking off in squares when cool enough.

CANDIED GINGER.

CANDIED VIOLETS.

"Dainty Dishes."

Dissolve 1 cup sugar in a little water and boil until it threads. Set aside to cool slightly. Take fresh double violets, dip them in the syrup, and then sprinkle with confectioner's sugar. Lay away in dry sugar. Rose petals and tender crisp mint leaves are done the same way. These make pretty garnishes for fancy desserts.

CHIPS.

To make "white fondant", put $2\frac{1}{2}$ pounds sugar and $\frac{1}{4}$ teaspoon cream tartar in a smooth granite saucepan with $1\frac{1}{2}$ cups hot water. Boil without stirring till the soft ball is reached. As the sugar adheres to the sides of the kettle, wash it off with the hand dipped in cold water. Butter a large platter or a marble-topped table, and pour the mixture slowly on it. Let stand a few minutes only to cool. Then scrape up together and work with a wooden spatula or spoon until white and creamy. If it lumps, work with the hands until perfectly smooth again. Put into a bowl, cover with oiled paper, and let stand 24 hours to ripen. Always make it on a clear day.

"Coffee fondant" is made by using strong coffee in place of water.

"Maple fondant" is made by using half maple sugar.

For an uncooked white fondant, beat the white of 1 egg with $\frac{1}{2}$ tablespoon cold water and $\frac{3}{4}$ teaspoon vanilla. Add gradually as much fine confectioner's sugar as it will take up to the amount of 1 pound. This is good if eaten fresh.

Pears may be baked in the same way.

Apples may be cored or not, peeled or not, sugared or not for baking, according to the taste of the cook, and a good baking apple needs no water. They may be peeled, cored and quartered, put in a pan in the oven, sprinkled with sugar, a few sticks of cinnamon added, drawn butter poured over them, and then baked till done.

BROWNEED APPLES.

Pare and core tart apples; roll in melted brown sugar, fill the centers with chopped nuts, and bake in a pan with a little water about 25 minutes.

CANDIED APPLES.

Pare, core and halve tart apples; cover with water and stew till tender, not mushy. Make a syrup of sugar and orange juice, boil till about to candy, dip the apples in and lay on a flat plate till cold. Serve with whipped cream.

Mrs. Bernard Mitchell.

Boil 1 quart cranberries with 1 pint sugar and $\frac{1}{2}$ pint water for 20 minutes. Pour into the serving dish, and serve when cool.

STEWED CRANBERRIES.

Stem, and wash the berries, rejecting any spoiled ones. Put in a granite or porcelain lined kettle, pour in cold water till visible, and cook till soft, 10 or more minutes. Take off and mash with a potato masher, add pint for pint of sugar, and boil again just long enough to remove all the scum. Serve cold.

Green Gooseberries are done the same way, but need not be mashed.

Ripe Gooseberries are cooked like green ones, but require less sugar.

FROSTED CURRANTS.

Take fine, clean bunches of ripe currants, dip in frothed white of egg mixed with a little cold water; drain and roll in pulverized sugar. Dip several times, and lay on paper to dry. They make a pretty garnish for jellied desserts.

FRUIT SALAD, NO. 1.

Mrs. John E. Jones.

Cut small 3 oranges, 3 bananas, 1 large apple and 1 cup English walnuts. Put a layer of oranges at the bottom of a glass dish, cover with sugar, then bananas and sugar, next apple and sugar, and lastly the nuts. Let stand from $\frac{1}{2}$ to 1 hour in a cold place before serving.

FRUIT SALAD, NO. 2.

Prepare a pineapple for the table, cutting the slices small; slice oranges in small pieces, removing the seeds; sprinkle each separately with sugar and let stand; cut Malaga grapes in half removing the seeds; and lastly, slice several bananas fine, sprinkling with sugar and lemon juice. Let all infuse in their liquors awhile; then mix together, and pour over them a wine dressing. If wine is not used, take more lemon and sugar. Serve in glasses with a Maraschino cherry on top.

Grape fruit is good with the above fruits, and its juice is very useful where wine is not employed.

FRENCH PEACHES.

Peel, halve and stone 12 peaches; sprinkle with 2 tablespoons sugar and 2 tablespoons maraschino. Let stand till absorbed. Heap the centre of a glass dish with whipped, sweetened and flavored cream, and arrange the peaches around it.

STEWED PRUNES.

Wash thoroughly, cover with cold water, and soak several hours, or over night. In the morning put prunes and water in a granite saucepan and simmer till tender. Sweeten to taste; some prunes need no sugar. Take out the fruit, boil down the syrup a little and pour it over them. Serve cold.

Any dried fruit may be cooked the same way.

BAKED QUINCES, NO. 1.

Wipe, core and pare the quinces; put in a baking dish, half fill with water, put a heaping tablespoon sugar on each, cover and cook till soft in a slow oven, basting frequently. They are good baked in their skins, but either way takes a long time.

BAKED QUINCES, NO. 2.

Pare, quarter and core the quinces; stew in clear water till they can be pierced with a straw; put into a baking dish with $\frac{1}{2}$ cup sugar to every 1 quince, pour over the water in which they were boiled, cover closely and steam in the oven 1 hour; take them out, put in a covered bowl to keep warm, and boil the syrup 20 minutes; pour over the fruit, cover and set away to cool. Serve cold.

STEWED RHUBARB.

Wash the rhubarb and cut in inch lengths; do not peel if young; cover with pound for pound of sugar, let heat slowly till the sugar melts, then rapidly until it boils. Skim and take up without stirring. Serve cold.

CANNED FRUITS AND VEGETABLES.

CANNED FRUITS.

Take fruit in good condition, clean and handle it carefully, use granulated sugar, have the jars clean, sterilized, whole, the tops and rubbers in the same condition, put the fruit in boiling hot and cover at once, and fruit will keep with much or little sugar. Keep in a cool, dark place. Canned vegetables are much more uncertain. If put in glass jars, it would be well to cover the glass.

APPLES.

Take bell flowers or equally good apples; peel, core, and throw into cold water to keep from discoloring. Weigh the fruit and allow $\frac{1}{4}$ as much sugar; put the apples on the fire, pour over them boiling water, and let cook slowly till nearly done. Put the sugar on to boil with twice the quantity of water; when boiling transfer the apples with a skimmer to the juice; add 1 lemon sliced to about 4 pounds of fruit; boil until tender enough to pierce easily with a straw. Lift carefully with a silver spoon, and fill the heated jar standing in a pan of hot water on the stove. Do not stop the kettle from boiling. Fill the jar to the brim with the syrup, wipe clean, put the cover on instantly, and put aside out of a draft to cool. The next morning tighten the lids still more if possible. More apples may be boiled in the same water, but if any syrup is left it should be canned separately and fresh made. Do not put the lemon peel in the jars.

Quinces may be added to the apples to mutual benefit, in the proportion of 1 to 4.

Apricots may be canned as apples, either with or without the stones. In the latter case, add a few kernels to the syrup. Omit the lemon.

APPLES WITH PINEAPPLE.

To 4 pounds of apples allow 1 good sized pineapple. Pare it, remove the eyes and grate it, adding it to the syrup preparing for the apples, with an extra allowance of sugar for it. Quarter the apples, and continue as for canned apples, omitting the lemon.

BLACKBERRIES.

Put the berries in a porcelain lined kettle, cover with $\frac{1}{4}$ the quantity of sugar, and let stand 1 hour or more. Put over the fire, and let come to the boil. Skim and can immediately.

Blueberries, elderberries, black and red raspberries are canned like blackberries; ripe gooseberries and strawberries require twice as much sugar; otherwise they are canned like blackberries. If meant for table use all canned fruit should be sweetened to taste, as the berries themselves vary in different pickings. Sauce should have enough in the first place; pies are improved by adding it fresh.

CHERRIES.

For table use do not stone; for pies, stone the cherries, and in either case allow $\frac{1}{2}$ pound sugar to 1 pound fruit, if sour cherries. If a sweet variety, use less sugar. Continue as with blackberries.

CRANBERRIES.

Wash and pick over the berries very carefully, stemming such as need it, and throwing out the soft ones. Fill the jars and pour in cold water till it overflows; screw on the tops and let stand 24 hours. Open the jars, pour off the water, fill again to overflowing with fresh water, and screw on the lids "for keeps." They may also be canned as stewed for the table.

Green gooseberries and green currants, it is said, may be kept in the same way.

CURRANTS.

Can at any stage of ripeness or unripeness, if they have begun to be juicy. Stem the currants, and allow $\frac{3}{4}$ their weight of sugar. Finish as blackberries.

If currants are added to red raspberries it should be in the form of juice, using about $\frac{1}{3}$ currants. Allow extra sugar for the juice, pint for pint.

GRAPES.

Take ripe grapes and snip off the stems close to the grapes without cutting the skins. Fill Mason jars with the fruit, and set on a board in the oven turning on the heat so as to heat through without breaking the skins. Make some grape juice as for jelly, have pint for pint of sugar hot, and when the juice comes to the boil, add the hot sugar, stir till dissolved only, boil a few moments till the scum can be removed. Take out the grapes a jar at a time, and fill the jar full with the juice, sealing at once. Plums may be canned whole the same way.

GREEN GOOSEBERRIES.

Stem and wash the berries. If for sauce, allow pint for pint of sugar. If for pies, $\frac{1}{2}$ the amount is better. Finish as with blackberries.

PEACHES.

Pare and stone the peaches and throw them into cold water. Put half the weight in sugar on the fire with an equal quantity of water, and stir till the sugar is dissolved. Put in the peaches, bring quickly to the boil, skim, and let simmer slowly till tender.

Lift very carefully into jars, fill to the brim with the boiling syrup, and fasten up. A few kernels are an improvement.

Small and inferior peaches and clings should be pared only and not stoned. Some jars even of freestones should be done that way, as the flavor is superior to that of the stoned fruit.

PINEAPPLE.

Mrs. Andrew Shuttleworth.

Peel the fruit, take out the core and eyes, slice or grate it and sprinkle over night with $\frac{3}{4}$ pound sugar to 1 pound pineapple. Add 1 cup water to each 4 pounds fruit, cook and skim for 20 minutes, and can.

PLUMS.

Allow $\frac{3}{4}$ the weight of the plums in sugar; cover with it and let stand over night. For small plums continue as with blackberries, cooking slowly until tender. Prick large plums before sugaring down.

QUINCES.

Pare and quarter the quinces, removing the cores. Continue as with apples, but allow twice as much sugar and no lemon. Use the parings and the skins (not the cores) for jelly, and cover with the water the quinces were boiled in.

RHUBARB.

Take young and tender rhubarb, wash, peel and cut into small pieces. Pack in glass jars, fill to overflowing with fresh cold water, screw on the covers tight, and let stand over night. Drain off the water, fill again to overflowing with fresh water, screw the lids on again, and put in a cool dark place.

Rhubarb may also be canned as stewed for the table.

STRAWBERRIES.

Stem the berries, and wash in a colander if sandy. Allow $\frac{1}{4}$ pound sugar to 1 pound berries, mix with the berries, and let stand 1 hour. If there is not enough juice extracted, add a little water to the kettle, and boil 5 minutes.

CANNED VEGETABLES.

CORN, No. 1.

Mrs. Frank Connell.

Take 9 cups young corn cut from the cob, add 1 cup water, 1 cup sugar, $\frac{1}{2}$ or $\frac{2}{3}$ cup salt. Boil 10 minutes and seal in glass jars. When opening for use, drain off the liquor, and freshen the corn in lukewarm water for 3 or 4 hours. Then drain again and cook in milk, seasoning to taste. The sugar may be omitted, if desired.

CORN, No. 2.

Fill the jars with cut corn, and then proceed as for String Beans, No. 3, but without adding water. Screw the lids on; at the end of 3 hours loosen them up a moment, then screw up again and boil another hour. The cans must be just as full as they can hold and the lids not too tight at first.

CORN AND TOMATOES.

Take young green corn, cut from the cob and put in a kettle with twice the quantity of peeled and quartered tomatoes. Bring to the boil and cook till the tomatoes are soft, then can. Corn is certain to keep in this way. Less tomatoes will answer. Some prefer to cook the corn on the cob first for 10 minutes.

PEAS.

Select tender young peas. Shell and pack closely in the jars, and continue as with String Beans, No. 2.

PEPPERS WITH TOMATOES.

Mrs. E. S. Martin.

Halve the peppers, remove the seeds, and soak in salt water 1 hour. Add to a kettle of tomatoes, in any proportion liked, and can with them.

PUMPKIN.

Wash and cut in small squares without peeling; fill the kettle, add a very little water to start it, cover closely and steam till tender; take off the cover and boil dry if it takes all day, stirring often. Put in jars or cans and seal immediately. If in glass, cover the jar to keep out the light.

SPINACH.

Pick over fresh spinach with more than usual care, and wash through several waters. Cook in boiling salted water about 20 minutes or till done. Take out with a fork and pack in hot jars, filling them very full. Pour in boiling water till it overflows, and seal.

Okra, beans of all kinds, peas, whole beets, whole tomatoes, succotash, etc., may all be canned in the same way, by preparing as for the table and boiling till tender, not soft.

STRING BEANS, NO. 1.

Mrs. W. J. Miller.

Take young green beans, string and break them, and cook about $\frac{1}{2}$ hour or until tender. Drain and fill Mason jars, putting first a layer of beans and then a layer of salt, finishing up with the salt. Seal immediately. When wanted for use soak until perfectly fresh, then cook as if they were fresh beans. They may also be packed in stone jars with a weight on top, and well tied up.

STRING BEANS, NO. 2.

Mrs. John Sweeney.

String beans should be tender and young. String them and break into 1 inch lengths. Pack closely in tin cans or glass jars, add 1 teaspoon each of salt and sugar dissolved in water to each jar, fill the jars with cold water, and cover loosely. Put in a kettle or boiler, pack hay around to keep the jars steady, fill with cold water to the neck of the jars, and boil 3 hours. Keep the water in the boiler at the same height by adding boiling water. Screw the lids on tight, and when the bottles are cold, screw again. If cans are used, take off the lid, wipe dry, return it immediately and seal before taking out of the kettle.

Lima beans, peas and asparagus tips may be canned in the same way.

STRING BEANS, NO. 3.

Mrs. Blanche Eberts.

Can according to String Beans, No. 2, but omit the salt and sugar.

TOMATOES.

Scald and peel the tomatoes, cut in quarters, and boil until soft. Add an even tablespoon salt to a kettle. Stir and skim as often as necessary. Keep the tomatoes boiling while filling the jars. If wanted as whole as possible, do not quarter, and only heat them through.

FRUIT JELLIES.

Make jelly on a clear day. Take the fruit just ripe or a little under ripe. Do not pick it just after a rain, and do not wash unless sandy. Large fruits should be wiped clean, the decayed spots removed, then cut in quarters or less, placed in a preserving kettle, and barely covered with cold water. Cover the kettle and let cook slowly till soft. Stir occasionally to keep from burning. The small fruits should be picked over carefully, placed in a stone jar inside a large preserving kettle, the kettle filled with hot water as high as practicable, and kept filled with boiling water as fast as it boils away. Stir once in a while to heat the fruit evenly.

When soft, turn the fruit into a coarse flannel bag (first dipped in hot water and wrung dry), tie the bag, and hang it up till the juice all drains out. Do not squeeze the light colored jellies, or they will be cloudy. When the juice quits dripping, squeeze dry for a second grade of jelly. Measure the juice, put it over the fire in a preserving kettle, and bring it to a boil. Allow pint for pint of sugar, and put it in earthen dishes where it will heat. When the juice boils, skim it well, add the sugar, stirring just enough to dissolve it quickly, and boil without stirring till done. Put a little in a cold saucer, and if it jellies on top it is done. Or dip a spoon into the boiling syrup, and if the last drops cling to the spoon, while the bowl remains covered, it is done. Begin

testing in 15 minutes unless it appears done earlier. The time depends somewhat upon the amount of water, and the thoroughness of the previous cooking of the fruit. Skim well and take off the stove.

Have the glasses ready, washed in hot water, and kept hot; take the syrup out with a cup and fill them, pouring a little at a time in each. A silver teaspoon left in a glass while filling is a safeguard against cracking. Keep the glasses out of a draft until cold. The next day, if the jelly is set, cut white glazed paper to fit the inside of the glasses, dip in brandy and lay over the jelly. Or pour melted paraffin over it to the depth of $\frac{1}{4}$ an inch. Fasten on the tin tops and set away in a cool place. A troublesome, but satisfactory top consists of white glazed paper, cut a little larger than the tops of the glasses, dipped in white of egg, and pasted over with the hands.

If the jelly is not firm in 24 hours, cover with paper or glass and set in the sun for several days. If still not jellied, boil it over.

Some fruits make a "ropy" jelly. If some one of the reliable kinds is combined with an unreliable one, it will correct this. Grape, quince, apple and currant give no trouble. Apple, or rhubarb, makes a good base for the more expensive jellies, and also tones down too strong a flavor.

APPLE JELLY.

Wipe the apples, cut out spots, and cut into small pieces. Put in a preserving kettle, place over the fire, and pour over fresh water until nearly covered. If the apples are somewhat tasteless, cut part of a lemon in with the fruit. Proceed according to general instructions.

BLACKBERRY JELLY.

Make according to general instructions for small fruit. Squeeze.

CHERRY JELLY.

Make according to general instructions for small fruit.

CRABAPPLE JELLY.

Make precisely like apple jelly, but do not use lemon.

CRANBERRY JELLY.

Put the berries in the kettle, with $\frac{1}{4}$ the amount of water, and boil until soft, about 10 minutes. Squeeze through a bag. Return the juice to the kettle, with an equal amount of sugar, and boil about 15 minutes or until it jellies.

CURRANT JELLY.

Pick the leaves and spoiled fruit from the currants; do not stem, and only wash the bunches that are sandy. Put in a stone jar, set that in a preserving kettle and proceed according to general instructions. Test the jelly in 5 minutes or less.

Currant shrub may be made from the mashed currants in the bag, after the juice has quit dripping. Turn them into a stone jar, cover with cold water and let stand over night. Squeeze through a jelly bag, sweeten to taste, grate a little nutmeg over it, and put on the ice till quite cold.

GOOSEBERRY JELLY.

Put the berries in the preserving kettle with a little water, as with the large fruits. Finish according to general directions.

GRAPE JELLY.

Pick the grapes from the bunches, and make according to general instructions for small fruit.

GREEN GRAPE JELLY.

Take the grapes just as they start to color. Cut from the bunches, wash if necessary, and put in a preserving kettle, pouring in water until it is seen. Continue according to general directions. The large fox grape makes the best jelly.

PEACH JELLY.

Pare, stone and cut up the peaches. Put in a stone jar with a very little water, and a few of the kernels. Put the jar in a kettle and pour boiling water in the kettle. Continue according to general directions. A little lemon juice strained and added to the peach juice will help it to jelly.

PEAR JELLY.

Make precisely like apple jelly.

PLUM JELLY.

Wash the plums, put in a kettle with a little water, and cook till they go to pieces. Strain without squeezing. Finish according to general instructions.

QUINCE JELLY.

Wipe the quinces, cut out spots, quarter and remove the cores, then cut into smaller pieces. Put in the preserving kettle, cover with cold water, and continue according to general instructions. Where apples are plentiful and quinces scarce, $\frac{1}{2}$ apples may be used; and the parings from quince preserves and marmalade should be used in making jelly. Test the jelly after 15 minutes boiling.

RASPBERRY JELLY.

Make according to general instructions for small fruit. $\frac{1}{2}$ currants is a pleasant addition, and ensures the jellifying.

RHUBARB JELLY.

Cut the rhubarb into inch lengths, put in a preserving kettle with 1 small cup water to each 2 quarts of rhubarb; simmer till soft, and squeeze through a jelly bag. Allow 1 pound sugar for each pint juice. Continue according to general directions. A few apples, or half blackberries may be added to the rhubarb.

STRAWBERRY JELLY.

Make according to general instructions for small fruit.

TOMATO JELLY.

Mrs. Nick Fuchs.

Take yellow or bright red tomatoes; cut them up and boil until soft with a small piece of lemon. Turn into a cheesecloth bag and drain without squeezing. To 1 pint tomato juice take $\frac{3}{4}$ pint sugar. Continue according to general instructions.

TUTTI FRUTTI JELLY.

Mrs. Rorer.

Take equal quantities of sour cherries, red raspberries, currants and strawberries. Mix together, put in a jelly bag and squeeze hard. Wash the bag out well, return the juice to it, and let drip through without squeezing. Now proceed according to general directions.

PRESERVES, JAMS AND SYRUPS.

APPLE BUTTER, No. 1.

Mrs. Richard Johnson.

Wash, core and cut the apples small; cover with water and stew till tender; rub through a sieve, and flavor with oil of cinnamon and sugar to taste. Put back in the kettle and boil, stirring constantly, till done.

APPLE BUTTER, No. 2.

Cook $\frac{1}{2}$ bushel good pippins thoroughly in 1 gallon sweet fresh cider; rub through a colander; return to the fire, add 6 pounds white sugar, cook several hours stirring constantly. $\frac{1}{2}$ hour before it is done add ground cinnamon, cloves and allspice to taste. Cook till quite thick; when cool pour into stone jars, and cover tight.

APPLE MARMALADE.

Peel and slice fine 25 pounds good cooking apples, add 1 quart cold water and the juice of a lemon, cover the kettle and cook slowly until soft. Press through a sieve into a bowl. Allow $\frac{3}{4}$ pound granulated sugar to each pound marmalade, put in a fresh kettle, add 2 gills cold water, a little vanilla, and cook over a brisk fire for 10 minutes. Add marmalade, and boil for 12 minutes, con-

stantly stirring, fill Mason jars while hot and seal. This will keep in stone jars if covered with brandy papers and tied up tight.

Pear and quince marmalades are made in the same way.

BLACK CURRANT JAM.

Prepare rhubarb as for jelly, and take 3 pints rhubarb juice. Put it in a preserving kettle with 9 pounds sugar, stir till it boils, then add 6 pounds black currants, and boil for 15 minutes or until the currants are tender. Seal in small jars.

BRANDY PEACHES.

Take fresh clingstones, and drop for a minute in boiling lye. Take out with a perforated ladle, and drop into cold water. Rub with a rough towel to remove the skins, and drop into a prepared syrup of $\frac{1}{2}$ pound sugar to each pound of fruit, and water enough to dissolve it. Let cook 15 minutes, take from the syrup, and put on dishes to cool. Boil the syrup down to half, and add an equal quantity of old peach brandy or French brandy. Seal or tie up in jars.

CHERRY JAM.

Stone the cherries. Put them in a kettle over a good fire. If sweet cherries allow $\frac{3}{4}$ quart sugar to 1 quart stoned fruit; a little fresh currant juice may also be added. If sour cherries, the sugar should be almost quart for quart. Continue as for gooseberry jam.

CURRANT SYRUP.

Mrs. E. S. Martin.

Prepare the currant juice as for jelly. Put in a kettle with half the quantity of sugar, stir until dissolved, and boil briskly just until it can be well skimmed. Have ready some thoroughly clean hot bottles, fill, cork and seal. A little raspberry juice is an improvement.

Other fruit juices are prepared in a similar manner, using less sugar for the sweeter fruits. They make delicious drinks with the addition of a little water (and, in some cases, lemon) and ice. Are also useful for water ices and pudding sauces. Have the juice clear, bottle while very hot, and neither sweeten enough nor cook long enough to have it turn to jelly.

GREEN GOOSEBERRY JAM.

Mrs. H. C. Begland.

Stem and wash 1 pound green gooseberries, put in a kettle with 2 pounds sugar and 2 cups water. Boil 1 hour or until they become red.

RIPE GOOSEBERRY JAM, No. 1.

Mrs. Francis.

Boil 1 pound sugar with $1\frac{1}{2}$ cups water 10 minutes; add 1 pound ripe gooseberries and cook 1 hour.

RIPE GOOSEBERRY JAM, No. 2.

Stem and wash ripe gooseberries, and measure them. Put in a preserving kettle and mash with a potato masher. Add $\frac{3}{4}$ sugar and boil 20 minutes, or more, stirring continuously. Skim, seal very hot in Mason jars, or, if boiled down sufficiently, pour in stone jars, cover with brandied paper and tie up securely.

Blackberry, raspberry, strawberry, huckleberry and currant jams are made precisely as gooseberry jam, except that the amount of sugar varies,—less for huckleberries and blackberries, more for currants. Jams should always be sweetened according to taste. $\frac{1}{3}$ currants to $\frac{2}{3}$ red raspberries improves either jam, as $\frac{1}{3}$ pineapple improves strawberry jam.

GRAPE JAM.

Stem and wash ripe Concord grapes. Pop them, put the pulps in a kettle and stew until the seeds will separate. Press through a colander to remove the seeds, return the pulp to the kettle with the skins, and for every quart of grape add $\frac{3}{4}$ quart sugar. Finish as gooseberry jam.

GRAPE JUICE, No. 1.

Mrs. D. A. Williams.

Mash 3 quarts fresh grapes, pour over them 2 quarts cold water, and 1 ounce tartaric acid. Let stand 24 hours, and strain. To 2 pints of juice, add 1 pint sugar, put over the fire, let come just to the boil, bottle and seal while hot.

GRAPE JUICE, No. 2.

Mrs. Anna Abram.

Take 4 quarts ripe grapes, picked from their stems and washed; cover with water and cook very slowly until the grapes are soft. Drain through a double cheesecloth. Add 4 cups white sugar, and when dissolved let boil up once. Bottle and seal, and keep in a dark place. Serve with equal amount of syrup and water and a little lemon.

ORANGE MARMALADE, No. 1.

Mrs. Peter McQuade.

Slice the oranges on a cabbage slicer. Weigh them, and to every pound of fruit, add $1\frac{1}{2}$ pints water. Boil $\frac{3}{4}$ hour. Let stand 24 hours, weigh again and to every pound of fruit allow $1\frac{1}{2}$ pounds sugar, and juice of 2 lemons. Do not put sugar in till the fruit comes to a boil, and cook only until clear. Skim and put into pint glasses or jars.

ORANGE MARMALADE, No. 2.

Mrs. Wm. J. Davis.

Put 6 large oranges and 4 lemons in a kettle, cover with cold water and boil slowly 2 hours. Take out the fruit and reduce the juice to 1 quart. Take out the seeds, and shred the fruit very fine (using the scissors); then return to the juice, and add 10 pounds granulated sugar, and boil slowly for 35 minutes.

ORANGE MARMALADE, No. 3.

Mrs. David Campbell.

Wipe 4 pounds bitter oranges and 2 lemons thoroughly, and grate off all the yellow rind. Cut off all the white inner rind, put it aside and cut the pulp up fine into a preserving kettle with 2 quarts water; let boil $\frac{1}{2}$ hour, stirring frequently; strain through a jelly bag without squeezing. Measure the liquor and put back in the kettle with 1 pint sugar to each $\frac{1}{2}$ pint; add the yellow grating, and let it boil hard for 10 minutes. Skim and can.

ORANGE SYRUP.

Boil 1 pint orange juice with 1 pound sugar 10 minutes. Skim, and bottle when cold. Use for drinks, pudding sauces, etc.
Lemon syrup is made the same way, using 2 pints sugar.

PEACH BUTTER.

Mrs. J. Williamson.

Pare and halve $\frac{1}{2}$ bushel peaches; put in a large kettle and stir constantly to prevent sticking until perfectly smooth and thick. Put a number of kernels in at first, and take them out before it is done. Add 5 pounds sugar, when nearly done; put in jars, and cover tight or seal. A little cider boiled with it is good.

PEACH MARMALADE.

Take 25 pounds ripe good peaches, halve them, remove the stones, cut in two again, add 1 quart cold water and 1 pound granulated sugar, and cook over a brisk fire until soft, stirring frequently. Remove, and press through a sieve into a bowl. Crack the peach stones, remove the kernels, and blanch them, adding a number of them to the marmalade about five minutes before it is done. With this exception peach marmalade is continued according to the apple marmalade recipe.

Apricot marmalade is made in the same way.

PINEAPPLE HONEY.

Boil 2 pints sugar and 2 pints water until thick as honey. When nearly done add 1 grated pineapple and stir till thick enough.

PINEAPPLE SYRUP.

Put 3 pounds of prepared pineapple in 1 quart water; boil till very soft. Mash and strain; to 1 pint juice take 1 pound sugar, boil to a syrup, bottle and cork tightly.

PLUM BUTTER.

Mrs. Thomas Fletcher.

Cook 1 peck plums and $\frac{1}{2}$ bushel sweet apples in separate kettles till soft, with just enough water to prevent scorching. Rub through a colander, mix, and to each pound of fruit add $\frac{1}{2}$ pound sugar; cook till thick enough, put into jars and seal.

PLUM JAM.

Allow 1 pound sugar to each pound large plums, and 1 cup water. Put the plums and water on the stove, and bring to the boiling point. Take out the plums with a skimmer, and remove the skins and seeds. Put these back in the kettle and boil 20 minutes, then strain, put back in the kettle with the sugar, let boil 5 minutes, then add the plums and cook about 30 minutes, or until done.

Small plums may be boiled down thick with or without the seeds, but retaining the skins.

POT POURRI.

Mrs. Theodore Oxholm.

Put any left over fruit in a jar, add $\frac{1}{4}$ or more sugar, and cover well with brandy. From day to day, other fruits may be added, always putting in the proper amount of sugar. When the jar is full, leave enough brandy to cover well, and seal. If these jars are started at the beginning of summer, many an odd saucer of berries will be saved, and the pot pourri is delicious, served with ice cream.

PRESERVED CHERRIES.

Wash, stem and stone tart cherries. Save the juice and put in a preserving kettle with the sugar, allowing pound for pound of fruit and sugar. When the sugar is dissolved put in the cherries, and boil until the juice is thick. Put in glasses or sealed jars. If the cherries are covered with the sugar for an hour or two, there will be more syrup.

Currants are preserved in the same way.

PRESERVED CRABAPPLES.

Select ripe Siberian crabs and wash them. Put in a kettle, cover with boiling water, and simmer till the skin will peel easily; then drain, skin and take out the cores with a penknife. Weigh and allow pound for pound of sugar. Dissolve the sugar in half the quantity of water, boil and skim till clear. Add the crabs and boil slowly till tender, skimming and stirring as necessary. When done, put in small jars or tumblers, cover with the syrup, and let get cold. Cover as you would jelly.

Or the fruit may be cored in the first place and not peeled at all.

PRESERVED DAMSONS.

Stem the fruit; put in stone jars in alternate layers with an equal weight of sugar. Cover the jars, place them in a large kettle of cold water, bring to the boil, and let simmer till tender. Put the damsons carefully into tumblers or jars, pour the juice into a preserving kettle, boil it briskly 15 minutes, strain through a jelly bag, and pour over the fruit. Seal the jars, and cover the glasses when cold as for jelly.

PRESERVED MULBERRIES.

Mrs. Rorer.

Put 1 pound mulberries and 1 cup water in a preserving kettle, simmer till soft, then strain and squeeze out all the juice. Put this back in the kettle, add $1\frac{1}{2}$ pounds sugar, boil and skim till clear, add 1 pounds mulberries, and simmer 15 minutes. Set aside over night. If the juice is not jellied in the morning, simmer again 15 minutes, breaking the berries as little as possible. Put into jars or tumblers, and fasten up when cold.

PRESERVED PEACHES.

Take ripe freestones. Pare, halve and stone. Weigh and allow pound for pound of sugar. Put in layers in a bowl over night. In the morning turn into a preserving kettle, add $\frac{1}{2}$ dozen kernels to each pound of fruit, and bring to a boil. Skim and set back to simmer till tender. Put carefully into jars or tumblers, and pour the syrup over them. Seal or cover.

Apricots and pears may be done in the same way. Pears require a few sticks of cinnamon, or a few slices of lemon for flavoring.

PRESERVED PINEAPPLE.

Peel the pineapples, cut out all the eyes and grate. Allow equal weight of sugar and pineapple, and boil, stirring often, until it forms a rich jam.

PRESERVED PLUMS.

Treat the plums as you do crabapples; when skinned, weigh and allow pound for pound of sugar. Mix the sugar through them and let stand over night. In the morning pour off the juice into a kettle, bring to the boil, skim till clear, add the plums and simmer till clear, perhaps 30 minutes. Put carefully into tumblers or small jars, boil the syrup down a little more, and pour over them. Cover or seal as required.

PRESERVED QUINCES.

Pare, core and slice or quarter the quinces. Put in the kettle, cover with boiling water, and simmer till tender. Take out and place on platters till all are done. Use the same water for all. Put the parings and rough pieces into this water, cover, and simmer 1 hour; strain and measure, allowing pint for pint in sugar. Put back in the kettle with the sugar and stir till it is dissolved, and boil for 10 minutes, skimming thoroughly. Now add the quinces and boil till clear, tender and red. Keep the cover on. When done, put into glasses or jars, boil the syrup till about to jelly, pour over the fruit, and let get cold before fastening up.

PRESERVED STRAWBERRIES.

Marion Harland.

Stem the berries, separating the fine ones from the bruised. Mash the latter and strain through a jelly bag. Allow 1 pound

sugar to each pint of juice, put in the preserving kettle and boil juice and sugar for 15 minutes, or until showing signs of jellying. Weigh the perfect berries, allowing pound for pound, add the sugar to the syrup, then the fruit, let cook through, skim and put in jars.

Raspberries and blackberries are preserved in the same way.

PRESERVED STRAWBERRIES AND PINEAPPLE.

Mrs. L. G. Byrne.

Prepare the fruit, allow $\frac{1}{2}$ pineapple to $\frac{2}{3}$ strawberries and cook according to any favorite method of preserving strawberries.

PRESERVED GREEN TOMATOES.

Marion Harland.

Take 8 pounds small green tomatoes, pierce with a fork; add 7 pounds sugar, the juice of 4 lemons, and 1 ounce mace and ginger mixed. Heat all together slowly and boil till the fruit is clear. Take out with a skimmer and spread out to cool. Boil the syrup till thick. Put the fruit in jars, and cover with the hot syrup.

Small, ripe, yellow tomatoes are preserved in the same way.

PRESERVED WATERMELON, NO. 1.

Mrs. Hugh Ewing.

Take the green rind of the melon and scrape the outside off. Make the thickness you wish. As you scrape, rinse in clear water and throw into a pan of water with a little alum in it. Put grape leaves at the bottom of the kettle, then put in the rind and alum water, cover with leaves and then with the cover. Cook over a slow fire for 3 or 4 hours. Make a strong ginger tea. Put the rinds in and let them be covered in it 3 days. (If the weather is warm, the tea should be changed.) Take pound for pound of sugar and rind, make a rich syrup with a little lemon peel in it and mace, put the rind in and boil slowly until you can put a straw through. Put in glass jars, pour the syrup over and seal.

PRESERVED WATERMELON, NO. 2.

Mrs. Samuel Whitmer.

Cut enough of the white inside rind of watermelons into small pieces to make 1 gallon. Peel, core and cut small 4 or 5 quinces. Put in a stone jar a layer of sugar, then a layer of melon and quinces till all are in; set in a cool place for 24 hours; put in a preserving kettle and boil slowly for several hours till well preserved.

QUINCE CHEESE.

Boil quince marmalade until so thick that it will retain the form of a mould when cold. "Leather" is marmalade boiled still longer, put in a mould and cut in slices to eat with the fingers. Any fruit may be treated in this way, but much less sugar must be used than for marmalades.

QUINCE HONEY.

Mrs. Eli Rush.

Peel and grate six large quinces, and 2 sour apples. Boil 5 pounds granulated sugar in 4 pints water until the syrup strings. Add the fruit and boil until it jellies. Put in sealed jars.

The honey may be made entirely of quinces.

ROSE SYRUP.

Mrs. Rorer.

Stir 1 pound rose leaves into a kettle of freshly boiling water, take from the fire, cover, and let stand over night. Strain through a fine cloth, add 4 pounds granulated sugar, put in a double boiler, and boil until the sugar is thoroughly dissolved. Cool and bottle.

Violet syrup is made the same way, taking the petals only.

PICKLES, CATSUPS AND VINEGARS.

BANDEN SAUCE.

Mrs. Florrie Walters.

Salt 3 gallons green tomatoes and 5 gallons cabbage all chopped fine, and let stand over night. In the morning, drain, and put in a kettle with 4 pounds brown sugar, 1 ounce each of celery seed, mustard seed, ground cloves, white pepper, white ginger root and turmeric, and 2 gallons vinegar. Boil 1 hour, put in jars, and tie up tight or seal.

BEAN PICKLES.

Boil fresh young beans till tender in salted water; drain, and when cold, fill jars, sprinkle with cayenne, or add a pod or two, a tablespoon each mustard seed and horseradish chopped, and cover with cold vinegar.

BEET PICKLES.

Mrs. R. V. Dixon.

Boil, peel and slice the beets or keep them whole. Put in $\frac{1}{2}$ gallon jars, and sprinkle over them 1 teaspoon salt and 2 teaspoons whole mixed spices to each jar. Add 2 pounds light brown sugar to each gallon of vinegar, boil together and pour over the beets. Seal while hot.

CABBAGE PICKLE.

Mrs. Jacob Newman.

Chop up the cabbage fine. Add $\frac{1}{2}$ cup salt and 1 cup sugar to 1 quart vinegar, with a little water to weaken if very strong. Just bring to the boil and pour over the cabbage. Stir up well. When cold it will be ready to use. This will keep in a stone jar with a saucer over it if tied up well. Be sure the vinegar is over the top of the cabbage.

CHILI SAUCE, NO. 1.

Mrs. Bryan Leonard.

Peel and chop 1 dozen ripe tomatoes, and 2 onions; seed and chop 4 ripe peppers, add 2 to 3 tablespoons salt, 2 of sugar, 1 teaspoon mixed spices, and 3 cups vinegar. Boil 1 hour.

CHILI SAUCE, NO. 2.

Mrs. John Keller, Jr.

Scald, peel and chop fine 50 large ripe tomatoes; add 15 onions chopped; 4 red peppers chopped fine; 10 cups vinegar; 2 cups granulated sugar; 1 cup salt; 2 teaspoons ground cinnamon; 1 teaspoon each cloves and ginger. Boil 2 hours, stirring enough to prevent scorching; and seal while hot.

BEEF TEA, NO. 1.

Mrs. Thomas Ewing.

Cut into small pieces 1 pound lean beef, cover with 1 quart cold water, and when it comes to the boil let simmer 20 minutes. Let it get cold, skim, strain, and add a little salt and pepper.

BEEF TEA, NO. 2.

Fill a bottle with lean beef cut in small pieces, cork loosely and put in a kettle of cold water keeping it upright by tying to the handle of the kettle. Boil for 2 hours, then press out the liquid and skim it. Season with salt and pepper, and wine if ordered for the patient.

BOILED FLOUR.

Dip a linen cloth in cold water and heavily dredge with flour to make a crust; put in 1 pound flour and tie up tightly; boil till it becomes a hard dry mass. Grated and prepared as arrowroot gruel it is an excellent substitute for it.

COCOA CORDIAL.

"Boston Cooking School."

Mix 1 teaspoon each cocoa and sugar, add enough hot water to form a paste, then the rest of $\frac{1}{2}$ cup; boil 1 minute and add $1\frac{1}{2}$ tablespoons port wine. Useful in cases of chill or exhaustion.

CRACKER GRUEL.

Roll and sift a fresh cracker; scald 1 cup milk, add the cracker with a pinch of salt; boil 5 minutes.

"Boston Cooking School."

Heat 1 quart milk till lukewarm; add $1\frac{1}{2}$ tablespoons sugar and $\frac{1}{2}$ of an yeast cake dissolved in 1 tablespoon warm water. Fill beer bottles within $1\frac{1}{2}$ inches of the top, cork and invert. (The corks must be firmly tied on.) Let stand for 6 hours at a temperature of 80 F. Chill, and serve the following day.

LIME WATER.

Mrs. Hugh Ewing.

To a pint bottle of rainwater put 1 gill good freshly slacked lime. Let it stand quietly well corked, pouring off gently when wanted. Is good for digestion. 1 tablespoon for a child of two, 1 gill or more for an adult.

MILK PORRIDGE.

Put 1 pint milk and 1 pint water over a brisk fire; mix 2 tablespoons wheat flour, corn meal, or oatmeal with cold water to form a thin paste. When the milk boils, stir in the paste very carefully. Boil at least $\frac{1}{2}$ hour.

MILK PUNCH.

Mix $\frac{1}{2}$ cup milk with 1 tablespoon liquor, sugar and grated nutmeg to taste. Cover the vessel and shake well.

MILK TOAST.

Cut off the crusts of stale bread and slice $\frac{1}{2}$ inch thick. Toast over the fire till brown and not scorched. Butter and place in a deep dish. Sprinkle with salt. Bring some milk to the boil, add butter and salt, and pour over the toast. Serve immediately. Do not make much at a time, as soaking spoils it.

MULLED WINE.

"Invalid Cooking."

Put $\frac{1}{2}$ cup water in a saucepan with a very small piece of cinnamon and 1 clove. Boil for 10 minutes; then add $\frac{1}{2}$ cup wine and let the liquid just reach the boiling point. Meanwhile beat together very hard 1 egg and 1 tablespoon white sugar; pour the wine over it slowly, stirring constantly. Serve hot.

Beer, ale and porter are excellent mulled in the same way.

MUTTON BROTH.

Cut 1 pound lean mutton in small pieces, pour over it a pint and a half of boiling water and let simmer $\frac{1}{2}$ hour. After straining, a little cold boiled rice may be added or some barley water.

OATMEAL BLANC MANGE.

Stir 2 heaping teaspoons fine oatmeal in a little cold water, and then stir into a quart of boiling milk; boil a few minutes, flavor, and turn into a mould; when cold, serve with cream and sugar.

OATMEAL WATER.

Put 4 tablespoons fine oatmeal in a small jug and fill with cold water; shake well and allow to settle. This is a safe drink during exposure to the sun in summer.

PANADA.

Take Bent's water crackers, split, sprinkle with sugar, salt and nutmeg, cover with boiling water, and set in a warm place, covered, for an hour or more until quite soft. Serve in the same bowl. Other crackers will do.

Bread panada is made by first toasting the bread. The sugar and nutmeg may be omitted.

RICE GRUEL.

Add 1 heaping tablespoon of ground rice to 1 quart water; boil gently for 20 minutes. When nearly done add 1 teaspoon ground cinnamon. Strain and sweeten slightly. Wine is sometimes added.

SAGE TEA.

Pour 1 quart of boiling water over $\frac{1}{2}$ ounce dried sage. Let infuse for $\frac{1}{2}$ hour and strain. Add sugar and lemon juice if desired.

SAGO GRUEL.

Pour 1 pint water over 2 tablespoons sago; boil gently until it thickens, stirring frequently. Wine, sugar and nutmeg may be added as desired.

SASSAFRAS TEA.

Mrs. Samuel Whitmer.

Get red sassafras root in March; wash and scrape, and peel off the bark. Dry well. Put a small handful in a fresh teapot, pour 6 cups boiling water over it, and steep for 10 minutes. Other herb teas are made in the same way.

STERILIZED MILK.

Put the fresh milk in bottles, cork loosely, stand in a kettle of cold water, the water three fourths their height, bring the water just below the boiling point and keep it there 10 minutes.

TAPIOCA JELLY.

Pour 1 pint water over 2 tablespoons tapioca; boil gently for an hour until it looks like jelly. Add sugar, wine, nutmeg, or lemon juice according to circumstances.

THICKENED MILK.

Mix a tablespoon flour and a pinch of salt smooth with a little cold milk. Pour over it a quart of boiling milk and when it is thoroughly mixed put all back into the saucepan and boil up once, being careful not to burn, and stirring all the time to prevent lumping. Serve with slices of dry toast.

TOAST WATER.

Cut thin slices of bread and toast brown in the oven. Break into small pieces; pour over them an equal quantity of boiling water, and let infuse 1 hour. Strain through a thin cloth and add a pinch of salt. Serve hot or cold.

WATER GRUEL.

Pour 1 quart boiling water over 2 tablespoons oat or corn meal. Boil 15 minutes and strain, adding salt and sugar also if desired.

WINE WHEY.

Scald 1 cup milk, and add 1 cup wine, sherry or port. Let stand 5 minutes, or until the curd and whey shall separate. Strain and serve hot.

ODDS AND ENDS.

CANDIED LEMON PEEL.

Cut the fruit into quarters lengthwise, take out the pulp and put the peels into strong salt and water for 2 days; take out and soak 1 hour in cold water, put into a preserving kettle with fresh cold water, and boil till the peels are tender, then put them on a sieve to drain. Make a syrup of 1 quart of the water in which they were boiled and 1 pound sugar, and simmer the peels in it $\frac{1}{2}$ hour or until clear; pour into a bowl to stand till the next day. Make as much syrup as will cover them in equal quantities of sugar and water, boil this till it threads, put in the peel, stir and boil $\frac{1}{2}$ hour; take out, drain on a sieve, and as they dry put on a dish to finish drying in a cold oven or other warm place. Store in tin boxes for use in mincemeat, plum puddings, etc. Do orange and citron the same way.

CARMEL.

Put white sugar in a saucepan, let it melt, and stir it until it becomes quite brown and begins to smoke. Add an equal quantity of boiling water, and simmer until a thick syrup. Bottle, and use for coloring soups, sauces, etc.

CARMINE.

Carmine is made by mixing 1 ounce of No. 40 carmine (obtained from the druggist) with 3 ounces boiling water and 1 ounce ammonia. Bottled and corked it will keep indefinitely. It is used for coloring ice creams, jellies, candies, etc. A few drops are sufficient.

DRIED BEANS.

Boil wax beans in water until tender; drain, place on a stretcher and dry like corn. Use the same water to cook each batch of beans in.

DRIED CITRON.

Pare and quarter and boil till clear and tender; drain, put into a rich syrup and boil till sweetened through. Take out, put on dishes, sprinkle with sugar, put in a cold oven and dry slowly, turning till dry. Pack in tin boxes with sugar between the layers.

DRIED CORN.

Husk and silk the corn carefully, and use only fresh green ears. Cut the grains from the cob with a sharp knife not too close, and scrape with the back of the knife. Put in breadpans

in a hot oven, and cook stirring at times till the milk dries up. Now scatter the corn on a stretcher. Put outdoors in the sun, and dry. Put in thin muslin bags, and tie these up in heavy paper bags. Hang up in the attic.

To make a stretcher, tack thin muslin to a frame stretching it as tightly as possible.

DRIED CURRANTS.

Put the currants at the bottom of the preserving kettle with half the quantity in sugar over them; when the sugar is dissolved let boil a minute or two then skim from the syrup and spread on plates to dry in a cool oven. Boil the syrup till it is thick, then pour it over the currants to dry with them. Pack in jars, and cover tight.

Berries and cherries may be dried in the same way, using less sugar.

DRIED PARSLEY.

Select fresh crisp sprays of parsley, wash well, plunge in boiling salted water, boil 1 minute, take out, drain and dry before the fire as quickly as possible; put in a tin box and store in a dry place. Before using, soak in warm water for a few minutes to freshen it. Other herbs may be dried in the same way.

DRIED PEACHES.

Pare, cut in halves and stone the peaches. Lay on earthen plates, cut side up. Sprinkle with sugar; set in a moderate oven with the door open. Turn 2 or 3 times a day. When dry but neither hard nor scorched, pack in jars and cover closely. When cooked, put in a saucepan, cover with warm water, and let stand on the back of the stove for several hours; then sweeten to taste, and let boil only a few minutes.

Plums and apples are dried in the same way, but plums are not pared.

DRIED PEARS.

Mrs. Hugh Ewing.

Peel a peck of pears. Put in a kettle with 3 pints water and 3 pounds white sugar. Cook till transparent, then take out, drain and lay out to dry. Rub in sugar every day or two. Tomatoes may be done the same way.

DRIED PUMPKIN.

Mrs. Wm. Hoskins

Stew the pumpkin as for pies and mash fine. To every quart, add 2 tablespoons sugar, and 1 of molasses. Stew on back of stove till quite dry. Grease shallow pans, put in an inch thick and dry in the oven. Put in paper bags to keep clean. When wanted, soak a quantity over night.

FRENCH HONEY.

Mrs. Wm. C. Connell.

Dissolve a small lump of alum the size of a hickory nut in $1\frac{1}{2}$ pints of water, with 5 pounds white sugar. Boil 3 minutes. When cool, add $\frac{1}{2}$ ounce rosewater.

ORANGE EXTRACT.

Cut off the yellow outside peel of 5 oranges, shave it thin, put in 1 pint good alcohol, and cork tightly. Let stand for a fortnight.

Lemon extract is made in the same way.

PEACH EXTRACT.

Blanch the pits of peaches, pound to a paste, and add twice the quantity of brandy. It will take the place of bitter almonds.

POTATO YEAST.

Mrs. Richard Johnson.

Peel 1 dozen good potatoes, cover with water and boil till done. Mash in the pot. Cover 2 handfuls hops with water and boil till the strength is extracted—about $\frac{1}{2}$ hour; strain into the potatoes; add 1 cup sugar, 1 tablespoon each of ginger and salt, and 2 cakes yeast foam. Let rise about 24 hours, fill bottles not too full and cork loosely. It will keep several weeks. $\frac{1}{2}$ cup answers for a setting of bread.

SOUP POWDER.

Dry 1 ounce each of lemon peel, thyme, sweet marjoram and parsley in a warm oven; pound and sift, and add 1 drachm powdered celery seed; bottle and cork. 1 teaspoon may be added to 1 quart of almost any soup.

TO BROWN COFFEE.

Butter a baking dish thoroughly, put in good green coffee, $\frac{1}{3}$ Mocha and $\frac{2}{3}$ Java. Put in a moderate oven to roast until brown, from 20 to 25 minutes. Stir well occasionally. Put in a stone jar and keep well covered.

TO BROWN FLOUR.

Spread on an iron pan and set in a hot oven, stirring continually after it begins to color. Brown evenly all through. Keep in a glass jar in a dry place. It is added to hash and gravies.

TO CLARIFY BUTTER.

Put $\frac{1}{2}$ pound good butter in a double boiler; when thoroughly melted, skim, strain through a fine cloth, and keep in a moderate temperature until wanted.

TO CLARIFY WINE.

Beat the white of 1 egg with a little wine, and stir into the whole. This will do for 10 gallons wine.

TO CORN BEEF.

Have your beef cut up in suitable pieces for cooking. Then pack them loosely in a tight barrel, placing a weight on top. Cover them with the following brine: 4 gallons water, 8 pounds salt, 2 ounces saltpetre, 1 quart molasses; put in a kettle and bring to a boil; skim thoroughly, let cool and pour over the beef. Let remain in the brine until wanted for use. If the brine should mould, pour it off, bring it to a boil again, skim and pour over the beef quite hot.

TO CURE BEEF HAM.

Mrs. Robert Snedden.

Make a brine that will float an egg, add 1 tablespoon each of ground cloves and allspice, 1 teaspoon cayenne pepper, and $\frac{1}{4}$ pound black pepper. Put in 2 beef hams, properly dressed by the butcher, and with the bones taken out. Let stay in the brine 3 weeks, changing their positions in the cask occasionally. Let drain several hours; then sprinkle lightly with brown sugar and cayenne pepper, if more is needed. Roll in a tight roll and wind with coarse string, hanging up to let dry. It may be cut from in a few days. Slice and cook as you would beefsteak. A slice of sidemeat cured in the same way is good to broil with the steak, as the beef seems dry to unaccustomed palates.

TO KEEP GRAPES.

Take full clusters, removing every bruised one. Dip the end of the stems in sealing wax, wrap each bunch in tissue paper and pack in boxes in layers, with paper between. Close the box; keep in a cool dry room.

TO KEEP LEMON PEEL.

Put all spare lemon peel in wide mouthed bottles, pour brandy over it and keep corked. This is always ready for use to flavor sauces, puddings, etc. If the fresh peel is chopped fine, and a little salt sprinkled over it in a dry bottle, it is ready to use for stuffings, croquettes, etc. Dried in the oven it is good to keep for flavoring stewed fruit.

Orange peel may be treated the same way.

TO KEEP PEPPERS

Pack in a jar with or without seedling and pour scabbling vinegar over them; cover and tie tight. When used, freshen in cold water. Or pull up the plant before frost bitten and hang by the roots in a cool place where it will not freeze. Or pick the

peppers before freezing, string and hang up. Chili peppers should be packed in wide mouthed bottles, and hot vinegar poured over them.

TO KEEP TOMATOES.

I. Take ripe tomatoes, wipe dry without breaking the skin. Put into a jar with cold vinegar, adding a thin muslin bag of cloves and whole peppers. Seal and keep in a dry place.

II. Before frosts, dig up tomato plants that are covered with green fruit, leaving plenty of dirt around the roots. Slip over the roots a heavy sack, and put the plants in the cellar. It may be necessary at times to wet the roots a little. Pick off the fruit from time to time and let ripen in a sunny window as wanted.

TOMATO FIGS.

Mrs. Eliza Marsh.

Scald and peel round ripe tomatoes. Put in a stone jar with equal weight of sugar. Let stand 2 days. Pour off syrup, boil and skim until clear. Pour over and let stand 2 days as before. Boil and skim again. After third skimming, let them stand in the syrup until good drying weather. Then place on large earthen dishes and let stand in the sun to dry. It will take about a week. After which pack down in small wooden boxes with fine white sugar between the layers. Will keep for years.

Apples boiled in the remaining syrup are good.

TO PACK EGGS.

Mrs. Calvin Essex.

Dip in boiling water, then pack in salt, small end down, not touching. Keep in a cool place.

TO SALT ALMONDS.

Shell the almonds, scald them and remove the skins. Melt a small lump of butter in a pan in the oven. Dry the almonds and put them in the butter stirring and turning as they brown. When a good golden brown, sprinkle considerable salt over them, and let stand until cold. Then rub off the excess of salt.

VANILLA ESSENCE.

Slice $\frac{1}{2}$ pound best stick vanilla, and pound in a mortar with 3 ounces lump sugar. Then put in a quart jar, fill up with the best alcohol, screw lid on tight, shake well, and it can be used in a day. It improves very much in strength with age.

HOW TO COOK HUSBANDS.

"Greenfield Hill Cook Book."

A good many husbands are entirely spoiled by mismanagement in cooking, and so are not tender and good. Some women keep them too constantly in hot water; others freeze them; others

put them in a stew; others roast them; and others keep them constantly in a pickle. It cannot be supposed that any husband will be good and tender managed in this way, but they are really delicious when properly treated.

In selecting your husband you should not be guided by the silvery appearance as in buying mackerel, nor by the golden tint, as if you wanted salmon. Be sure and select him yourself, as tastes differ. Do not go to the market for him as those brought to the door are always best. It is far better to have none than not to learn how to cook them properly. It does not make so much difference what you cook him in as how you cook him. See that the linen in which he is wrapped is white and nicely mended, with the required number of strings and buttons. Don't keep him in the kettle by force, as he will stay there himself if proper care is taken. If he splutter or fizz, do not be anxious; some husbands do this.

Add a little sugar in the form of what confectioners call "kisses", but no vinegar or pepper on any account. A little spice improves them, but it must be used with judgment. Do not try him with anything sharp to see if he is becoming tender. Stir him gently the while lest he stay too long in the kettle and become flat and tasteless. If thus treated, you will find him very digestible, agreeing nicely with you; and he will keep as long as you want.

USEFUL HINTS IN HOUSEKEEPING.

BORAX.

1 part of hot water dissolves 6 parts of borax. It makes a good wash for the hair or skin, where the water is hard. Is good to wash combs and brushes, paint, blankets, etc. Laces may be washed by leaving in water with a little borax in several hours, and then rinsing without rubbing.

BURNS.

Mix equal parts of white of egg and olive oil, spread over the burn, and bandage with a piece of old linen; or dust thickly with baking soda, bandage, and keep the bandage wet. This will prevent blistering.

COLD PROCESS SOAP.

Mrs. G. O. Beery.

Dissolve 1 ten cent can of Babbitt's potash and $\frac{1}{2}$ pound powdered borax in 3 pints warm soft water. Melt 5 pounds of clean rendered grease. When the solution is cool, and before the grease becomes hot, pour the grease slowly into the potash and borax, stirring constantly until the mixture is like molasses, when it can be poured into the vessel to harden. Just before it hardens, add $\frac{1}{4}$ pint gasoline.

CUCUMBER LOTION.

Fresh cucumbers mashed to a pulp are good to spread over a sunburned face. Cucumber peelings boiled and cooled make a good wash for the complexion.

ECZEMA CURE.

Mix $\frac{2}{3}$ sulphur with $\frac{1}{3}$ cream tartar, and enough N. O. molasses to make it palatable. Take 1 teaspoon every morning for 9 mornings; wait a week and take a second course.

HAIR TONIC.

Witch hazel rubbed well into the roots of the hair at night is an excellent tonic. So is sage tea or equal parts of quinine, whiskey and bay rum. Also loosening the hair and rubbing the scalp thoroughly with the hand brings excellent results.

$\frac{1}{2}$ pint sage tea mixed with $\frac{1}{2}$ pint bay rum, $\frac{1}{2}$ ounce tincture cantharides and 20 grains bisulphide of quinine is a good tonic also.

LINIMENT.

Mrs. George Howe.

Break a fresh egg into a bottle; add the same quantity of turpentine, vinegar and ammonia. Shake well. Fine for rheumatism, sprains and bruises.

LOTION FOR THE HANDS

Mrs. Wm. C. Connell.

Put $\frac{1}{2}$ ounce of gum tragacanth into 2 pints of soft water. Let stand for 2 days; then beat up well, strain, and add $\frac{1}{2}$ ounce alum dissolved in a little water, 4 ounces glycerine, 6 of alcohol, and 1 of boracic acid. Add 1 pint soft water and a little perfume if desired. Excellent for chapped hands.

OATMEAL SOAP.

Mrs. H. C. Beglund.

Shave 1 pound Castile soap, put on the stove in a tin pail, barely cover with water, and simmer gently till dissolved. Stir in 4 ounces each sweet almond oil and powdered borax, 1 ounce tincture benzoin, and the juice of 1 lemon. Beat it well, take from the stove and as it cools put by spoonfuls into fine oatmeal; shape into cakes with the hands, and dry. It improves with age.

SALVE.

Mrs. George Howe.

$\frac{1}{2}$ pound mutton suet, $\frac{1}{2}$ pint sweet oil, 5 cents worth of powdered rosin.

Melt the suet and pour over the rosin; add the oil, and mix them thoroughly. Ready for use when cold. Good for cuts, burns, bruises and boils.

TO KILL BEDBUGS.

Mix 5 cents worth corrosive sublimate with 1 pint wood alcohol; squirt with an oil can into the cracks of furniture every few days till rid of the pests.

TO REMOVE CLARET STAINS.

Mrs. J. G. Blaine.

If claret wine is spit on a cloth, cover at once with salt, and wash in cold water as soon as convenient.

TO REMOVE GRASS STAINS.

Wash in alcohol the stained goods.

TO REMOVE HOT WATER MARKS.

Cover the marks made by hot water jugs, etc., on polished tables with a paste of salad oil and salt, leave it there for an hour, and rub well with a dry cloth.

TO REMOVE INK STAINS.

Saturate the spot with lemon juice and cover with salt; let stand in the sun several hours; wash in warm water and then in Sapolio.

Iron rust is removed in the same way.

TO REMOVE OLD TEA AND COFFEE STAINS.

Wet the spots with cold water, cover with glycerine, and let stand 2 or 3 hours. Wash with cold water and hard soap. Repeat if necessary.

TO SET DYES.

Dissolve 1 teaspoon sugar of lead in a pail of water, and soak uncertain calicoes in it for 1 hour before washing.

BARGAINS

Oliver Typewriters, \$50 Each

\$5 Down and \$5 Per Month. Shipped to Any Address on Trial

An Extraordinary Half-Price Offer

The regular standard Model No. 3. Complete with metal case, baseboard, tools, etc.—not shop worn or damaged machines, but each and every one guaranteed to be absolutely perfect—as perfect as any ever sold.

No salesman will call on you. We are compelled to save such expenses to enable us to sell these machines at half price. The burden of proof rests with the typewriter and you are to be the sole judge.

If you find the slightest thing to criticize—if you think you can buy a better typewriter at any price—if for any reason you do not wish to keep the machine, send it back at our expense.

This is the greatest typewriter value ever offered. If you intend to buy a machine any time in the future it will pay you to secure one of these NOW.

If you are renting a typewriter, why not send it back and replace it with one of these splendid machines? You can pay us \$2.00 or \$3.00 more a month than you are now paying and in a few months own a \$100 standard typewriter—meantime you have a perfect machine to operate instead of a second-hand one.

Better write us now. You take no chance on this proposition; if the typewriter is just as we say—you have a bargain—if it is not, you send it back at our expense.

Don't wait until they're all gone—give us your name, address, and references to-day.

This extraordinary offer of OLIVER Typewriters is made to readers of "Old Country Recipes and New" as a special offer. It will give everyone a chance to own a first-class \$100 standard typewriter under the best terms ever offered.

This special offer places the OLIVER within easy reach of every home, business or professional man. Any one can now own a standard typewriter. By utilizing spare moments for practice students fit themselves for more important positions. The OLIVER is so simple any one can learn to operate it. Schoolboys and schoolgirls can now buy a real \$100 typewriter on very easy terms.

The OLIVER is the most highly perfected typewriter on the market and the most substantial. It will stand rough treatment—the kind that makes junk of many machines. Everything the best. The OLIVER Typewriter turns out more work of better quality and greater variety than any other writing machine. Simplicity, strength, ease of operation and visibility are the corner stones of its towering supremacy in everything that a typewriter can be used for.

Two-color ribbon attachment \$1.50 extra

Can You Afford to Let This Wonderful Offer Pass?

A really extraordinary opportunity to prepare for the big prosperity wave. High-class correspondence on first-class machine is the beginning of business success. Send coupon to-day.
